May 3, 2019

The Honorable Board of Directors and General Manager Placer County Water Agency

The Department of Financial Services is pleased to present the Comprehensive Annual Financial Report (CAFR) of the Placer County Water Agency (PCWA or Agency) for the year ended December 31, 2018. This letter of transmittal is designed to complement the Management's Discussion and Analysis and should be read in conjunction with it.

The California Government Code requires an annual independent audit of PCWA's financial statements by a Certified Public Accountant. Davis Farr LLP has issued an unmodified "clean" opinion on the Placer County Water Agency's financial statements for the year ended December 31, 2018, which is included in the financial section of this CAFR.

The CAFR presents the Introductory section, the Financial section, which includes the basic financial statements, and the Statistical section. Agency's management is responsible for the accuracy of the presented data and the completeness and fairness of the presentation, including all disclosures. All required disclosures necessary to enable the reader to gain the thorough understanding of PCWA's financial activity have been included. The independent auditors have expressed an opinion that PCWA's financial statements are presented in conformity with generally accepted accounting principles. Readers should refer to the Management's Discussion and Analysis in the audited financial statements included in the Financial section for a detailed discussion regarding the Agency's financial condition and results of operations.

## OVERVIEW OF THE PLACER COUNTY WATER AGENCY

PCWA was created in 1957 under its own state legislative act entitled the "Placer County Water Agency Act." The Agency is a special district and its boundaries are coterminous with the boundaries of Placer County, California. Placer County (County) is bordered by the State of Nevada on the east, Nevada County on the north, Yuba and Sutter Counties on the west and Sacramento and El Dorado Counties on the south. Placer County occupies an area of approximately 1,500 square miles, which includes relatively level valley lands in its western portion and extends easterly into the Sierra-Nevada Mountains to Lake Tahoe and the Nevada state line. The County is located immediately northeast of Sacramento County, approximately 100 miles northeast of the San Francisco Bay metropolitan area. Interstate 80 transects Placer County from west to east. The Agency has a five-member board of directors elected by district voters for four-year terms. The Agency carries out a broad range of responsibilities including resources planning and management, retail and wholesale supply of water, and production of hydroelectric energy and has staff of 226 regular employees providing services to its three operating budget units: Agency Wide, Power Division and Water Division.

## Agency Wide

Agency Wide provides the water and energy advocacy and stewardship functions within the boundaries of the County. Agency officials understand the complexities, interrelationships and importance of sustaining reliable and affordable water and energy for Placer County's present and future needs. PCWA serves as a local water resources management and stewardship entity striving to protect the watershed, water ways and water quality important to the people, lands and ecosystems of the County. PCWA holds extensive surface water entitlements and rights on the Middle Fork American River. Water is sold wholesale to various water purveyors who retail it to their customers. Agency Wide wholesales water to the City of Roseville, San Juan Water District, Sacramento Suburban Water District, and to PCWA's Water Division. Agency Wide activities are varied and far ranging. These include involvement in water issues affecting the Lake Tahoe and Truckee River system, the American River system, the Yuba/Bear Rivers system, the Central Valley Project and the Bay/Delta system. PCWA is actively involved in numerous collaborative partnerships, including watershed planning, groundwater management, and regional infrastructure and conjunctive use projects. Advocacy for PCWA water entitlements and energy resources for Placer County are at the forefront of Agency Wide interests and activities. The Middle Fork Project (MFP), an Agency Wide asset, consists of 3 storage reservoirs and 5 diversion dams, 5 power plants, diversion and water transmittal facilities, 5 tunnels and related facilities. The 1963 revenue bonds, which originally funded the construction of the MFP, were approved by a vote of the people of Placer County in 1961 and repaid on January 1, 2013. No single community or water system has a superior entitlement to receive the benefits of the MFP. The financial activities that flow from the sale of water from the MFP are kept in the Agency Wide division. The financial activities that flow from the operation and maintenance of the MFP and the sale of power are kept under the Power Division.

### Power Division

PCWA's Power Division was established with the construction of the MFP that began in 1963 and was completed in 1967. PCWA owns and operates 5 hydroelectric power plants, 3 primary storage reservoirs (French Meadows, Hell Hole and Ralston) and 24 miles of tunnels. The MFP can generate, at peak power, 224 megawatts that averages 1 million megawatt hours annually of hydroelectric power. The electricity generated is metered by the CAISO and shadow settled by the Agency. Power generation is sold directly to the CAISO, while other energy products services (renewables, resource adequacy and carbon-free)are be sold through bilateral contracts.

## Water Division

PCWA acquired its first and primary water system in 1968. With subsequent acquisitions and growth, the Agency has become the largest water purveyor in the County, serving more than 40,000 water accounts. Surface water supplies are purchased from PG&E and Agency Wide. The backbone of the water system is the 165 miles of canals, ditches, flumes and several small reservoirs that PCWA owns and operates, most of which were built in the gold rush era. PCWA delivers and sells a significant amount of untreated water for irrigation of pastures, orchards, rice fields, farms, ranches, golf courses and landscaping. The Agency owns and operates eight water treatment plants, 25 water tanks and over 600 miles of treated water pipelines. Treated surface water is sold directly to PCWA customers residing in Auburn, Colfax, Loomis, Rocklin, portions of Roseville and throughout various unincorporated areas of the County. Treated water is also sold wholesale to the City of Lincoln and others who retail it directly to their customers. The Agency

also uses groundwater to occasionally supplement surface water supplies when needed in Western Placer County.

## Sources of Water Supply

PCWA's region has plentiful water resources as its service area is bordered by two rivers: the Yuba/Bear River to the north and the American River to the south. PCWA's jurisdiction extends into the watershed that provides mostly gravity fed water to the Agency's water infrastructure. The Agency obtains water from three primary sources: 1) Currently, the majority of water PCWA delivers to its treated and untreated water customers in Western Placer County comes from water pursuant its Western Water Supply Contract with PG&E and allows the Agency to take delivery of up to a maximum of 100,400 AF per year from the Yuba and Bear Rivers through PG&E's Drum-Spaulding Project; 2) In 1982 the Agency acquired treated and untreated water systems serving the portion of upper Western Placer County that is adjacent to Interstate 80 from Alta, down through Colfax, to the Eastern boundary, just above Auburn. With this acquisition, the Agency acquired the right to purchase up to 25,000 acre feet annually from PG&E for use in this area with water from PG&E's Drum-Spaulding Project; 3) The Agency has up to 120,000 acre feet of water available annually from appropriated water rights developed through the construction of the 1963 Middle Fork Project on the American River. Water can be diverted into the water system through the American River Pump Station to Auburn tunnel and from Folsom Reservoir.

In addition to the three primary sources above, the Agency has rights to approximately 35,000 AF of water from the United States Bureau of Reclamation's Central Valley Project. The Agency also has two wells that reliably provide up to 2,000 AF of water per year within the Sunset Industrial area located in unincorporated Western Placer County. These wells provide back-up supply to the Agency's water system and are not routinely operated to meet normal system demands.

### Governance

PCWA is a public agency (special district) governed by a five member independently elected Board of Directors (Board) serving staggered four-year terms with one Director from each of the five Placer County supervisorial districts. The Directors reside within their geographical district areas and are elected by the constituents of that district only. Annually, a Chairman and Vice Chair are chosen among the Board members. PCWA operates under a Board-Manager form of government. The General Manager is appointed by the Board to administer the daily affairs of the Agency and carry out the policies of the Board of Directors.

The Board meets in regular session on the first and third Thursdays of each month. Regular meetings are held at 2:00 p.m. at the Placer County Water Agency Business Center, 144 Ferguson Road, Auburn, California. Board meetings are open to the public.

## **Budget Process**

Annually, the Agency prepares and adopts an operating budget and updates its five-year Capital Improvement Program (CIP). Both budgets serve as the foundation for the Agency's financial planning and fiscal control. Budgets are adopted on a basis consistent with governmental generally accepted accounting principles. Budgetary controls are set at the department level and are maintained to ensure compliance with the budget approved by the Board of Directors. Department directors have the discretion to transfer

budgeted funds between accounts/activities within their departments. Two consenting departments can transfer budgeted funds between their departments. Changes to the Capital Improvement Program budget and increases to the operating budget require Board approval.

## Significant Events and Accomplishments

## Water Year - 2018

Following the 2017 wettest year on record, 2018 was an average water year yielding 102% of average precipitation. MFP combined storage was at a healthy level of 107% of normal conditions.

## Middle Fork Project (MFP)

The Agency received a Clean Water Act Section 401 Certification from the State Water Resources Control Board (SWRCB) on April 17, 2019, however, the Federal Energy Regulatory Commission (FERC) met on April 18, 2019 and declared by motion that the SWRCB had waived their right to issue the 401 Cert. FERC will take into consideration, the 401 Cert, along with all other items filed for consideration in determining the final license terms and issuance. Implementation of certain beneficial infrastructure projects included in the new license has already begun, with planning and engineering of several MFP enhancements well under way. In addition, during this interim period, the Agency must maintain its commitments to providing a quality recreational experience for citizens at all MFP related facilities.

On January 1, 2018, the Agency took over the Scheduling Coordinator (SC) responsibilities of the MFP in the California Independent System Operator (CAISO) market. This allows the Agency to interact directly with the CAISO on day-to-day activities that were either previously managed by PG&E or where PG&E was an intermediary used to access the CAISO and energy markets. Also on January 1, the Agency transitioned the remote dispatch operations of the MFP from the PG&E Drum Powerhouse, to Northern California Power Agency (NCPA) in Roseville.

## MFP Water Rights Extension of Time

Staff continued progress on the development of an Environmental Impact Report that will be used by the State Water Board to support its decision regarding the Agency's petitions to extend the Agency's water rights on the American River until build-out of the service area is completed. The Agency has been preparing a draft CEQA document that will document the environmental impacts of withdrawing the additional MFP water from the American River. Due to developments at the Federal level, the Agency has turned its focus to negotiating a Warren Act Contract with the US Bureau of Reclamation that will be required to implement the mitigation associated with the Water Rights Extension Project. The Warren Act will require an Environmental Assessment under NEPA, which is currently being prepared in coordination with Reclamation, and Endangered Species Act consultation with National Marine Fisheries Service and US Fish and Wildlife Service.

## Bay-Delta Water Quality Control Plan Update

In December 2018, the SWRCB adopted the Bay-Delta Plan Amendments for the Lower San Joaquin River and South Delta. The amendments include, among other things, an unimpaired flow range for each of the major tributaries to the lower San Joaquin River. An effort to reach voluntary settlements on these

tributaries failed, as agreements were not reached on the Stanislaus or Merced Rivers, which resulted in the SWRCB adopting the Plan Amendments as proposed by staff.

In the Sacramento River watershed, there are proposed voluntary agreements on the Sacramento River and all its major tributaries. As part of its approval of the Plan Amendments, the SWRCB acknowledged the effort to reach agreement and directed staff to include those agreements in its analysis as an alternative to the unimpaired flow approach. There will be a significant effort in 2019 to ensure the agreements are included as an alternative to the unimpaired flow approach. In the event the SWRCB does not accept the voluntary agreements, the Agency will need to be prepared to protect the Agency's interests and investments in the American River watershed. The Agency expects to continue to work closely with its northern Californian partners in the Plan Amendment process.

## WaterFix

The evidentiary portion of the WaterFix proceeding concluded in late 2018. The Agency anticipated the SWRCB to either provide a briefing schedule or issue a draft decision on the WaterFix petition in early 2019. On May 2, 2019, however, the State of California announced the withdrawal of the permits and applications for the WaterFix project, thereby ending the project as it is currently known. The State is anticipated to begin working on a smaller, single tunnel project.

## French Meadows Forest Restoration Project

A diverse partnership is advancing the 28,000 acre French Meadows Forest Restoration Project, a collaborative approach to restore forest health and resilience to reduce the risk of high-severity wildfire around French Meadows Reservoir, a critical municipal watershed. The project involves clearing underbrush, thinning smaller trees, removing biomass to energy facilities, reforestation, restoring meadows and prescribed fire. Key to success of the Project is a strategic partnership and innovative funding. Partners include the Agency, the United States Forest Service (USFS), The Nature Conservancy, Placer County, American River Conservancy, the Sierra Nevada Conservancy, and the Sierra Nevada Research Institute at the University of California, Merced. The USFS has given its final approval of the Project and work is to begin in May or June 2019.

## Planning and Land Development

The Agency experienced a steady level of development activity, committing more than 500 new equivalent dwelling units (EDUs). Based on recent capacity enhancements and absorption forecasts, the Agency has sufficient water treatment capacity to meet demand to 2030. The Agency has made efforts towards new water supply infrastructure, including the Ophir Water Treatment Plant, through a revised water connection charge (WCC) model and by wholesale purchase agreements.

## ECONOMIC CONDITIONS OF PCWA

PCWA's jurisdiction is contiguous with the boundaries of Placer County, hence, County wide economic information follows:

## Placer County Economy

Placer County has been one of the fastest growing counties in California featuring thousands of acres available for growth, low cost housing and a skilled and educated workforce. In the last decade the County has experienced an overall population growth of approximately 13.1%, while the increase from 2017 to 2018 was only 1.9%. The long-term forecast for the County's growth is a steady of an average 1.1%. The population is expected to reach approximately 443,000 by 2028. The 2028 figure represents a 13.9% increase over the current population of 389,047.

At December 2018, Placer County's unemployment is currently lower than the State's average: Placer County at 3.1% and State at 4.1%.

The County's per capita personal income also exceeded the State's per capita personal income by 9.0% in 2017 (Data is not currently available for 2018). Please see the Statistical Section for additional information.

Placer County has experienced an increase in development over the past five years. For example, the Agency's Water Connection Charge revenues, which are charges to connect to new water service, increased from a total of \$5.0 million in 2013 to \$25.0 million in 2015 and \$10.4 million in 2018. The decrease in EDU commitment since 2015 was expected as the Agency has changed its EDU allocation method whereas the Agency may now only allocate a fraction of an EDU for a residential service that commits to a limited water consumption agreement.

## Long-term Financial Planning

Annually, during the budget process, the Agency reviews its water rates, fees and charges and makes adjustments, as needed, to provide the revenues and funding necessary to cover the Water Division's coming year operating expenses. Correspondingly, both the Power Division and Agency Wide budgets are reviewed to ensure they are balanced. The Agency's Capital Improvement Program is reported for the next 5 years, yet is projected up to 30 years out for the Water Division to ensure sufficient planning for necessary infrastructure. With certain Water Division infrastructure reaching the end of its maintainable life, in 2001 PCWA adopted a new component to the water rates to specifically fund the replacement of aging infrastructure. Since 2001, the renewal and replacement (R&R) charge has steadily grown to result in \$13 million annual funding for R&R Capital Projects.

On August 17, 2017, the Agency overlaid Zones 1, 2, 3, and 5 with a newly established Zone 6 (also known as the Western Water System), following a comprehensive Water Cost of Service and Rate Study (Study) across all Agency water services. Initiated in 2015 and completed in September 2017, the Study sought to (1) establish fair and equitable water rates for Zone 6 that proportionately allocated the costs of providing service in accordance with California Constitution Article XIII D, Section 6 (commonly referred to as Proposition 218), (2) provide sufficient revenue based on costs, (3) ensure rates are based upon the costs to

provide service to each customer class and each rate tier, and (4) produce an administrative record to support decisions made within the rate design.

The Study proposed a new rate structure and design that shifted the Water System revenue components from 45% fixed and 55% commodity based, to 60% fixed and 40% commodity based. This adjustment aligned revenue more closely to the Agency's cost structure, which is approximately 85% fixed, while still promoting conservation through a tiered commodity pricing structure. The Study also included a revenue requirement of \$3.74 million (increase of 8.3%) to the annual cost of service to replenish recent annual reserve use.

Following a public hearing held on November 2, 2017, the Agency's Board of Directors adopted a resolution on November 16, 2017 approving the Study's proposed rates, fees and charges, effective January 1, 2018, in order to establish uniform rates, fees and charges throughout the Agency's service area, consolidate some customer classifications, reduce the number of commodity tiers for many rate schedules, maintain a cost of service structure consistent with state law and industry standards, and allow for an annual inflation adjustment based on the Consumer Price Index for years 2019-2022, upon annual Board consideration and approval.

## FINANCIAL POLICIES AND GUIDELINES

The financial integrity of PCWA is of utmost importance. Maintaining fiscal stability is a critical component of the overall financial plan. PCWA is accountable to its ratepayers and the public for the use of public funds. Resources should be used wisely to ensure adequate funding for services, public facilities and infrastructure necessary to meet present and future needs. PCWA's financial policies and guidelines provide the backbone for making financial decisions and a benchmark for monitoring financial activities.

## **General Financial Policy Guidelines**

The General Financial Policy Guidelines, adopted in March 2005, provide a framework to guide the Agency's decision-making with respect to operations, budgeting, debt issuance, and financial planning. These guidelines provide overview policy guidelines in the areas of general, revenue, budgeting and expenses, reserves, investments, debt management, capital improvements, purchasing and fixed assets.

These guidelines state:

- The Agency will manage its financial assets in a sound and prudent manner.
- The Agency will maintain sound financial practices in accordance with generally accepted accounting principles, the Agency Act, Local, State and Federal laws and regulations.
- The Agency will maintain and further develop programs to assure its long-term ability to pay all the costs necessary to provide the level and quality of service required by its customers.

These guidelines are to promote sound financial management and to ensure that its finances are managed in a manner, which will:

- Support the continued delivery of quality services,
- Ensure the Agency's stability, efficiency and effectiveness in accomplishing the Board of Director's goals and objectives,

- Maintain a balanced budget annually to ensure that the Agency is operating within its revenue constraints, even when faced with growth demands, and
- Maintain adequate reserves necessary to meet known and unknown future obligations.

More detailed and specific financial policies have been developed and are addressed in specific policies discussed below.

## **Investment Policy**

The Agency's *Investment Policy* follows California Government Code objectives of safety, liquidity and yield (in that priority order). During 2013, the Agency updated and revised the Investment Policy to meet changing market conditions. Annually during the first quarter of each year, the policy is reviewed and readopted by the Board of Directors to ensure PCWA's Investment Policy is up-to-date with current regulations. The Director of Financial Services also serves as the Agency's Treasurer who annually reviews the Investment Policy and as necessary, submits recommended revisions to the Board for their annual consideration and approval. The investing process is carefully monitored to ensure compliance with the Investment Policy and other applicable regulations.

## **Budget Policy**

In 2018, the Agency's *Budget Policy* was updated to provide a more flexibility for the Capital Improvement Plan (CIP). Adopted by the Board in November 2006, amended in 2007 and again in 2018, the revised Budget Policy more clearly defines the budget process for both the operating and CIP budgets. This also provides better guidance to Agency personnel performing budgetary process functions. The policy requires balanced budgets, which will serve as a financial plan to promote financial stability while accomplishing the Board's goals and objectives.

## **Reserve Policy**

The Agency's *Reserve Policy*, initially adopted in 2005 as the *Net Asset Reserve and Designation Policy*, was renamed and revised in July 2015 for the purpose of a simpler more streamlined policy. This policy is designed to distinguish between Legally Restricted Reserves and Board Designated Reserves, establish distinct purposes for each reserve category, set funding targets and accumulation levels for reserves, and identify events or conditions prompting use.

The Reserve Policy provides guidance for establishing, funding and using reserves to meet known future obligations and unforeseen needs as deemed prudent and/or required by agreement. As available and deemed appropriate, Board Designated Reserves are funded to reserves in the following broad categories; Operational, Capital, Liabilities, Specific Activities, Programs and Special Projects. Each category is further defined by distinct reserve accounts, for example, reserve for contingencies under the operational category. Each reserve category has a description for purpose, funding amount, funding source and use.

## **Debt Management Policy**

In April 2007, the Agency adopted its first *Debt Management Policy*, which provides written guidelines and restrictions that affect the amount and type of debt issued by the Agency, the issuance process, and the management of the debt portfolio. The policy is intended to provide guidance for debt structure, its justification and evaluation. The primary objective of the Debt Management Policy is to establish

conditions for the use of debt and to create procedures and policies that minimize PCWA's debt service and issuance costs, retain the highest practical credit rating, and maintain full and complete financial disclosure and reporting.

## **Capital Asset Policy**

In August 2009, the Agency revised and updated its *Capital Asset Policy*, initially adopted in March 2005. This policy establishes the policy for asset capitalization and safeguarding and defines capital-type items (fixed assets) as land, buildings, machinery or equipment with an original cost of \$5,000 or greater and a useful life of more than one year.

The Capital Asset Policy stems from two objectives: (1) To accurately account for and report capital assets in financial reports and to update the guidelines for capitalizing capital-type items, and (2) to establish procedures to protect Agency fixed assets from damage, loss or theft.

## **Fraud Policy**

The financial integrity is of utmost importance to PCWA. Initially adopted in June 2004, the *Fraud Policy* formalizes the expectations of personal honesty and integrity required of Agency officials and employees. This policy sets out specific guidelines and responsibilities regarding appropriate actions that must be followed if fraud is suspected or identified and the subsequent investigation process.

## **Identity Theft Prevention Program**

In 2008, the Agency adopted an *Identity Theft Prevention Policy* consistent with Federal Trade Commission (FTC) Red Flag rules. This policy provides for the identification, detection, and response to patterns, practices, or specific activities ("red flags") that could detect identity theft.

## **Procurement Policy**

The Agency's *Procurement Policy* was revised and readopted by the Agency in 2018. This policy provides the framework and guidelines for Agency purchases and contracts. This policy covers all Agency procurement activities (commodity and service purchases and public works contracts) and adheres to Government Code Section 54202 that requires local governmental agencies to adopt policies and procedures including "bidding regulations, governing purchases of supplies and equipment."

## **P-Card Policy**

In 2016, the Agency adopted a *Procurement Card (P-Card) Policy* to provide the framework and guidelines for the prudent use of Agency Procurement Cards. The objective of the policy is to provide delegation of authority and responsibility within a framework of accountability and controls for an Agency P-Card Program.

## Major Initiatives

The Agency continues its active involvement at the Board and management levels in a wide variety of water and energy related issues affecting Placer County. The Agency continues participation in Bay-Delta, Lake Tahoe and Truckee River issues, a county-wide financial assistance program, American and Yuba/Bear River watershed interests, and an integrated water resources program including surface water, reclaimed water, conservation and groundwater management issues. The Agency's involvement includes the State's

plan to modify the water delivery infrastructure of the Bay-Delta and possible impacts upon Placer County's water supplies through the Delta Stewardship Council and its related programs; monitoring the Truckee River operating agreement; hearings on water right matters important to the Agency that are under consideration by the State Water Resources Board; legislative and regulatory advocacy at the state and federal levels; adapting the organization to an ever-changing and expanding role as a resource agency on water and energy issues; greater involvement in watershed, groundwater and planning strategies; and continued support of local Cities and the County's general plans (including Placer Legacy) relevant to water.

The Agency's Power System department will be implementing a number of new procedures in accordance with North American Electric Reliability Corporation (NERC) and Western Electricity Coordinating Council (WECC) rules. Compliance activities will include a procedure based maintenance management system to manage workflow, maintenance history documentation, new department record keeping processes and revised standard operating procedures. All of these compliance measures will allow the Agency to retain its good standing with NERC and participate in California's wholesale energy market through the CAISO. Beginning January 1, 2018, the Agency commenced working with new energy partners for the MFP power sales as well as other related energy commodities.

The Technical Services department will continue to manage several large projects in 2019, which include the Sunset Water Treatment Plant Expansion Phase 2 along with the Foothill Raw Water Supply Pipeline expansion projects to address growing demands in the region. Finally, water quality and plant maintenance operations will continue to perform in accordance with the Agency's responsibility to maintain and preserve water facilities and infrastructure, while delivering high quality potable water to its customers.

## FINANCIAL INFORMATION

## **Internal Controls**

Elected officials and those employed by the Agency are entrusted as stewards of public resources. Whether cash, equipment or water rights, these resources are entrusted to their care and need to be properly safeguarded, managed and accounted for. As with any good business operation, good decisions are based upon complete, accurate, reliable, relevant and timely information. A strong system of effective internal controls will provide a backbone for good stewardship and sound decision-making.

Internal controls are the system of checks and balances an organization employs to prevent and detect errors in the processing of data (accurate and reliable), to promote smooth operation, to monitor and maintain compliance and to safeguard and manage the entity's assets.

Integrated into the Agency's daily activities, internal controls are incorporated within the overall control environment. The Agency's control environment includes its organizational structure, culture, philosophies, policies and procedures as established by the Board and management. The control environment sets the "tone from the top" and promotes the organizational integrity of information for stewardship and decision-making.

PCWA is responsible for designating and maintaining an internal control structure to ensure that its assets are protected from loss, theft or misuse, and to ensure that adequate financial data are accounted for and

compiled into financial information including the annual financial statements. The internal control structure is designed to provide reasonable assurance the financial and other management information is authorized, accurate, and reliable. This concept of reasonable assurance recognizes that (1) the cost of control should not exceed the benefits likely to be derived, and (2) the valuation of costs and benefits requires estimates and judgments by management.

## Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to Placer County Water Agency for its comprehensive annual financial report for the fiscal year ended December 31, 2017. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

This CAFR reflects the hard work, talent and commitment of the staff members of the Financial Services Department. This document could not have been accomplished without their efforts and each contributor deserves sincere appreciation. I would also like to express appreciation to staff members of other departments who contributed to the preparation of this report.

Respectfully Submitted,

## **Independent Auditor's Report**

## **Report on the Financial Statements**

We have audited the accompanying financial statements of the Placer County Water Agency (the "Agency"), as of and for the year ended December 31, 2018, and the related notes to the financial statements, which collectively comprise the Agency's basic financial statements as listed in the table of contents.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

## Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Placer County Water Agency, as of December 31, 2018, and the changes in financial position and cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## **Emphasis of Matter**

As described further in note 1 to the financial statements, during the year ended December 31, 2018, the Agency implemented Governmental Accounting Standards Board (GASB) Statement No. 75. The financial statements for the year ended December 31, 2018 reflect certain prior period adjustments as described further in note 13 to the financial statements. Our opinion is not modified with respect to this matter.

## **Other Matters**

## Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedule of changes in net pension liability, the schedule of pension plan contributions, the schedule of changes in net OPEB liability, and the schedule of OPEB plan contributions be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

## Other Information

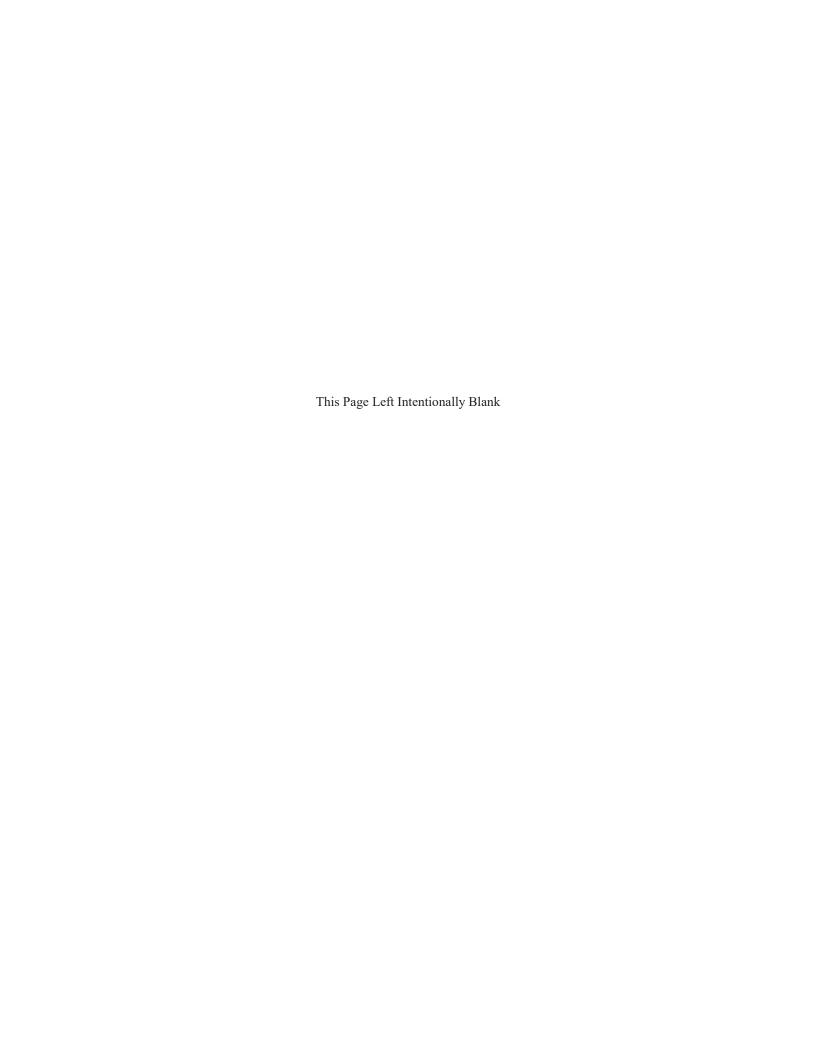

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Agency's basic financial statements. The *supplemental schedules*, the *introductory section* and the *statistical section* are presented for purposes of additional analysis and are not a required part of the basic financial statements. The *supplemental schedules* are the responsibility of management and were derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the *supplemental schedules* are fairly stated, in all material respects, in relation to the basic financial statements as a whole. The *introductory section* and the *statistical section* have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

## Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated May 3, 2019 on our consideration of the Agency's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Agency's internal control over financial reporting and compliance.

Irvine, California May 3, 2019

Management's Discussion and Analysis December 31, 2018

This section presents management's analysis of the Placer County Water Agency's (the Agency) financial condition and activities as of and for the year ended December 31, 2018. Management's Discussion and Analysis (MD&A) is intended to serve as an introduction to the Agency's basic financial statements.

This information should be read in conjunction with the audited financial statements that follow this section. The Agency, as the primary governmental entity, includes, within the financial statements, the financial position and activities of the Placer County Water Agency Public Facilities Corporation (Corporation) as a component unit. The Corporation is a blended component unit and does not issue separate financial statements.

The information in this MD&A is presented under the following headings:

- Organization and Business
- Overview of the Basic Financial Statements
- Financial Analysis
- Capital Assets and Capital Investment Program
- Long-Term Debt
- Requests for Information

### **ORGANIZATION AND BUSINESS**

The Agency was created in 1957 under its own legislative act and since inception has been actively involved in Placer County's 1,500 square mile area on a variety of water and energy issues. The Agency provides treated and untreated water services, produces hydroelectric power and provides stewardship over water and energy in Placer County. The Agency recovers cost of service through user fees.

The Agency's general operations division titled "Agency Wide" holds extensive surface water entitlements for which water is sold wholesale to various water purveyors. Agency Wide interests and stewardship activities include water entitlements and energy resources throughout Placer County.

The Agency's Power Division was established with the construction of the Middle Fork American River Hydroelectric Project (MFP) that began in 1963 and was completed in 1967. This Project constructed an integrated system of five interconnected hydroelectric power plants, two major storage reservoirs (French Meadows and Hell Hole), dams and tunnels with the capability of producing on average 1.03 million megawatt hours annually. The electricity generated is metered by the CAISO and shadow settled, or validated, by the Agency. Power generation is sold directly to the CAISO and energy products are sold through bilateral contracts.

The Agency's Water Division was established in 1968 with the acquisition of our first water system. The Agency operates an integrated treated and untreated (raw) water system that directly and indirectly serves over 300,000 people. Through 165 miles of canals, ditches, and flumes, as well as several small reservoirs, most of which was built in the gold rush era, the Agency serves untreated water customers and transmits water for treatment. The Agency owns and operates 8 water treatment plants, 26 water tanks and over 600 miles of treated water pipelines. Treated water is supplied to residential, commercial,

Management's Discussion and Analysis December 31, 2018

industrial, and other governmental users in the cities and surrounding areas of Auburn, Colfax, Loomis, Rocklin, portions of Roseville and various unincorporated areas of Placer County. Agency treated water is also sold wholesale to the City of Lincoln and other purveyors who retail it directly to their customers. In addition the Agency utilizes groundwater to occasionally supplement surface water supplies when needed in Western Placer County.

## OVERVIEW OF THE BASIC FINANCIAL STATEMENTS

The Agency's Basic Financial Statements are designed to provide readers with a broad overview of the finances of the Placer County Water Agency. There are three components to the Basic Financial Statements: (1) Financial Statements, (2) Notes to the Basic Financial Statements, and (3) Required Supplementary Information.

## **Fund Financial Statements**

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Agency, like other special purpose governments, uses fund accounting to ensure and demonstrate compliance with financial related legal requirements.

## Proprietary Fund

The Agency's proprietary (enterprise) fund consists of 3 divisions, Agency Wide, the Water Division and the Power Division. Proprietary funds are used to account for operations that are financed and operated in a similar manner to private business enterprises – where the intent of the governing body is that the costs (including depreciation) of providing goods and services to the general public on a continuing basis be financed or recovered primarily through user charges. The Agency's proprietary fund statements include the following:

The *Statement of Net Position (Balance Sheet)* presents information on the Agency's assets and liabilities, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Agency is improving or deteriorating.

While the balance sheet provides information about the nature and amount of resources and obligations at year-end, the *Statement of Revenues*, *Expenses and Changes in Net Position* presents the results of the Agency's operations over the course of the fiscal year ending December 31st and information as to how the *net position* changed during the year. This statement can be used as an indicator to determine the Agency's credit worthiness and the extent to which the Agency has successfully recovered its costs through user fees and other charges. All changes in net position are reported during the period in which the underlying event giving rise to the change occurs, regardless of the timing of the related cash flows. Thus, revenue and expense are reported in this statement for some items that will result in cash flow in future fiscal periods, such as delayed collection of operating revenue and the expense of employee earned but unused vacation leave.

The *Statement of Cash Flows* presents changes in cash and cash equivalents resulting from operational, capital, noncapital and investing activities. This statement summarizes the annual flow of cash receipts and cash payments, without consideration of the timing of the event giving rise to the obligation or receipt

Management's Discussion and Analysis December 31, 2018

and excludes noncash accounting measures of depreciation and amortization of assets. It also provides answers to such questions as where did cash come from, what was cash used for, and what was the change in cash balance during the reporting period.

### Notes to Basic Financial Statements

The Notes provide additional information that is essential for a full understanding of the data provided in the basic financial statements. The Notes to Basic Financial Statements can be found on pages 23 through 63 of this report.

**Other Information:** In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information and other supplementary information. Such required supplementary information regarding the Agency's funding of its obligation to provide pension benefits to its employees can be found on page 64 of this report. Other supplementary information can be found on pages 64 through 67 of this report.

## FINANCIAL ANALYSIS

Our financial analysis introduces the accompanying financial statements. One of the most important questions to ask is the following: "Is the Agency, as a whole, better off as a result of the year's activities?" The statement of net position and the statement of revenues, expenses and changes in net position present financial information regarding the Agency's activities in a manner to answer that question. These two statements report the Agency's net position and the changes resulting from the year's activity. You can think of the Agency's net position, the difference between assets and liabilities, as one way to measure financial health or financial position. Over time, increases or decreases in the Agency's net position is one indicator of whether its financial health is improving or deteriorating. However, other considerations, both financial and non-financial factors such as changes in economic conditions, population growth, zoning, new or changed government legislation and others should also be evaluated.

During 2018, the Agency's financial position remained strong. The significant financial events are illustrated in the financial analysis below.

## FINANCIAL HIGHLIGHTS FOR 2018

- Net Position increased \$12.1 million or 2.0% during the fiscal year.
- At year-end the Agency's assets and deferred outflows of resources exceeded its liabilities and deferred inflows of resources by \$702.7 million.
- Operating revenues increased \$11.5 million or 15% to \$89.3 million primarily the result of water and power sales increasing \$2.1 million and \$8.1 million, respectively.
- Non-operating revenue (expenses) increased \$10.7 million primarily from the increase in water connection charge revenue of \$2.6 million and the 2017 write-off of water treatment plant design work totaling \$6.6 million.

Management's Discussion and Analysis December 31, 2018

## Financial Position

The Agency's net position increased by \$12.1 million to \$702.7 million (see Table 1), which is a result of assets and deferred outflow of resources increasing by \$18.4 million and liabilities and deferred inflow of resources increasing by \$6.3 million.

Key components of the \$12.1 million increase in net position are as follows:

- Non-current assets increased \$6.1 million with long-term investment balances increasing.
- Capital assets increased \$11.2 million from capitalized construction and capital contributions.
- Deferred outflow of resources increased \$0.8 million, reflecting pension and OPEB contributions
  made subsequent to the measurement date, net differences between projected and actual earnings
  on pension plan investments, changes in assumptions on net OPEB liability as well as deferred
  charges on refunding of debt.
- Non-current liabilities increased \$2.5 million, primarily due to implementation of GASB 75, which increased liabilities by \$11.3 million by recording the net OPEB liability. The net OPEB liability is the portion of the present value of projected benefit payments to be provided to current active and inactive employees that is attributed to those employees' past periods of service, less the amount of the OPEB plan's fiduciary net position. This is net of a \$7.6 million decrease in long-term debt and a \$1.2 million decrease in the net pension liability.

Management's Discussion and Analysis December 31, 2018

# Net Position (In thousands)

	2018	2017	Variance	%
Current Assets	\$ 83,002	82,707	295	0%
Non-Current Assets	103,776	97,660	6,116	6%
Capital Assets	653,882	642,706	11,176	2%
Total Assets	840,660	823,073	17,587	2%
Deferred Outflow of Resources	13,255	12,446	809	7%
Current Liabilities	20,692	17,229	3,463	20%
Non-Current Liabilities	129,039	126,571	2,468	2%

Restricted	53,715	52,726	989	2%
Unrestricted	66,144	70,492	(4,348)	-6%
Total Net Position	\$ 702,728	690,676	12,052	2%

## Results of Operations

The Agency's 2018 total operating revenue of \$89.3 million increased \$11.5 million when compared to the 2017 amount (*see Table 2 on the following page*). The total operating expense increased \$1.4 million resulting in an increase to net operating income of \$10.1 million. Overall, the Agency's change in net position for the year, including capital contributions, increased by \$12.1 million compared to the 2017 net position. The major components of this increase are as follows:

- Operating revenue at the fund level changed as follows: Agency Wide decreased \$0.5 million, Power Division increased \$8.1 million and Water Division increased \$3.6 million. Power Division revenues reflect reimbursements of Agency's expenses related to the Middle Fork Project.
- The increase in power sales revenues reflects higher reimbursements from the Middle Fork Project Finance Authority due to significantly increased Capital Project expenses during 2018. The increase in Water Division revenue is two-fold: 1) the 2018 adopted rate structure change and increase and 2) treated water consumption was approximately 5% higher in 2018.
- Operating expense increased by \$1.4 million or 2% to \$86.7 million. Operating expense at the fund level changed from prior year as follows: Agency Wide decreased \$.04 million, Power Division increased \$2.2 million and Water Division decreased \$0.4 million. The increase in

Management's Discussion and Analysis December 31, 2018

Power Division is primarily due to road repairs and non-capital costs associated with the Hell Hole Dam Core Raise Project.

- Non-operating revenues (expenses) increased by \$10.7 million or 283% to \$14.5 million, which is a net change of the following: a \$2.6 million increase in Water Connection Charge revenue which fluctuates with building demand; a \$7.7 million increase in other non-operating revenue which includes a \$1.1 million increase in grant revenue, a \$6.8 million increase in gain on disposal of assets as there was a \$6.6 million asset impairment in 2017; a \$0.5 million decrease in costs recovered from other agencies as cost share activity decreased in 2018; a \$0.9 million increase in interest earnings.
- Contributed capital, consisting of water system infrastructure contributed to the Agency upon project completion, totaled \$3.5 million, which was comprised of various developer's agreement contributions.

Management's Discussion and Analysis December 31, 2018

Table 2 shows changes in the Agency's net position for the year.

# Table 2 Changes in Net Position (In thousands)

Note: Prior-period adjustments recorded in the current year have not been reflected in the 2017 column

Management's Discussion and Analysis December 31, 2018

## CAPITAL ASSETS AND CAPITAL IMPROVEMENT PLAN

At the end of 2018, the Agency had invested \$653.9 million (net of accumulated depreciation) in a broad range of infrastructure including; power facilities; water storage, transmission and distribution facilities; maintenance and administration facilities; vehicles; and equipment. The total increase in the Agency's investment in capital assets for 2018 was \$11.2 million, or 2%. The summary of capital assets is presented in note 3 to the basic financial statements. Table 3 provides a summary of capital assets for years-ended 2018 and 2017 as follows:

Table 3
Capital Assets
(In thousands)

		Increase/		
	2018	2017	(Decrease)	%
Land	\$ 17,200	17,168	32	0%
Utility Plant - Preliminary Survey	400	412	(12)	-3%

Total Capital Assets	\$ 653,882	642,705	11,177	2%

Management's Discussion and Analysis December 31, 2018

This year's major capital expenditures included (in thousands):

Agency Wide		
Business Center Exterior Improvements Phase 2	\$	819
Foresthill Facility Expansion		339
Power		
Communications Upgrade		5,210
Hell Hore Dam Core Raise		3,970
Sediment Removal		1,710
French Meadows Powerhouse Road Paving		1,578
Water		
Long Ravine Pipeline		3,130
Clover Valley Reservoir		2,345
South Canal Intertie		2,102
Alta WTP Improvements Phase 2		1,475
2018 Gunite		1,429
Total	\$ 2	24,107

The Agency's 2018 Budget includes a 2018 Capital Improvement Plan (CIP) budget totaling \$40.2 million, which is presented below by fund.

## **Capital Improvement Plan Budget (In thousands)**

Agency Wide	\$ 1,080
Power Division	12,246
Water Division	26,940
Total	\$ 40,266

## **LONG-TERM DEBT**

At December 31, 2018, the Agency had total long-term debt outstanding of \$75.9 million excluding the \$5.8 million in compensated absences payable. The outstanding amount decreased \$4.3 million during the year because of the following:

- The net retirement of \$9.8 million of Certificates of Participation.
- The retirement of \$1.3 million in loans payable.

More detailed information about the Agency's long-term debt is presented in note 4 to the basic financial statements. In 2016, the Agency received an upgrade by Standard & Poor's to an 'AAA' rating and maintained an Aa2 rating from Moody's Investors Service. These ratings were re-affirmed by both firms in March 2018 during our 2018 debt refunding that closed in April 2018.

The debt coverage ratio demonstrates the Agency's Western Water System financial strength and future

Management's Discussion and Analysis December 31, 2018

borrowing capability which is calculated at 4.28 times annual debt service for the Western Water System at December 31, 2018. Table 4 presents the Western Water System's debt coverage ratio and exhibits both 2018 and 2017 ratios being greater than the 1.20 times debt indenture covenant requirement.

Table 4

Debt Coverage Ratio - Western Water System
(In thousands)

	 2018	 2017
Net Water Revenue, Excluding Depreciation	\$ 29,666	\$ 15,033
Debt Service on Certificates and Other Parity Debt	6,933	7,551
Debt Coverage Ratio	4.28	1.99
Debt Coverage Ratio Requirement Based on Debenture	1.20	1.20

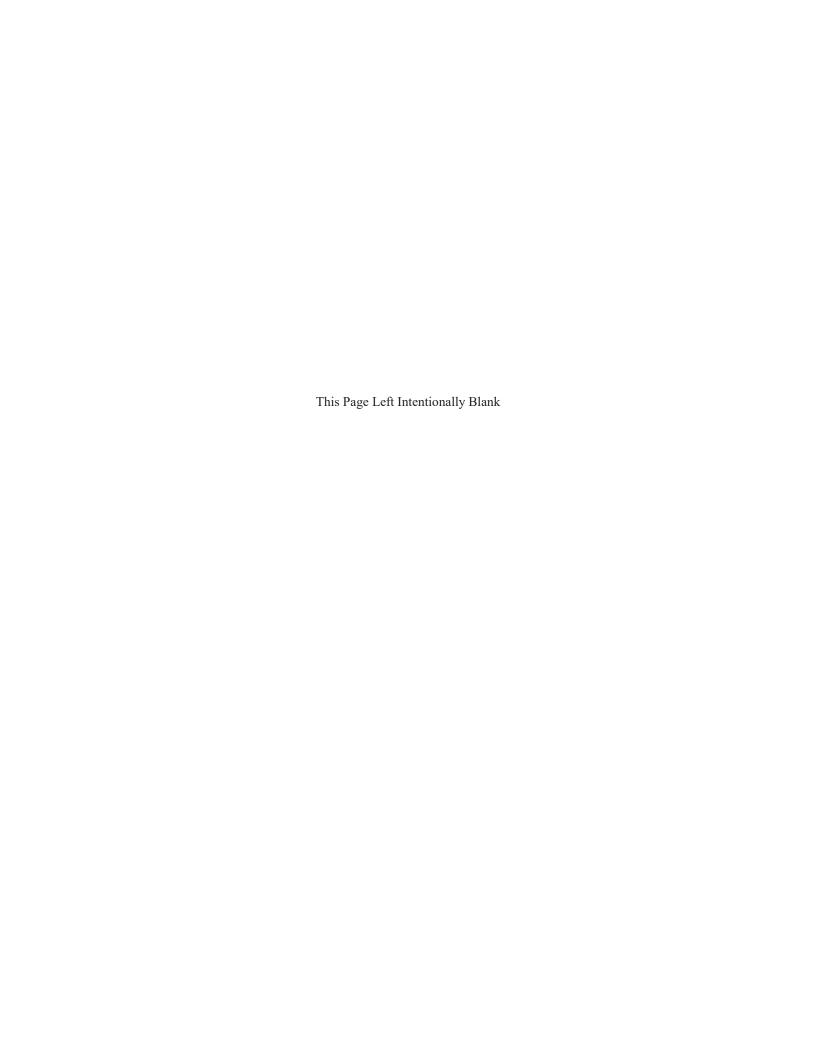

At December 31, 2018 the Agency had outstanding Certificates of Participation stemming from water system expansion projects (water connection charge projects) and replacement program projects, with varying maturities through 2037. The Agency's current weighted average cost of capital is 3.0% in outstanding debt as shown in the following table:

Table 5
Cost of Capital
(In thousands)

			Debt Balance		Average	Cost of
	Ex	pansion	Replacement	Total	Coupon Rate	Capital
Certificates of Participation	\$	36,411	15,394	51,805	4.2%	3.2%
Loans Payable			18,309	18,309	2.3%	2.3%
Total	\$	36,411	33,703	70,114	3.7%	3.0%

## **REQUESTS FOR INFORMATION**

This financial report is designed to provide the Board of Directors, ratepayers and creditors with a general overview of the Agency's finances and demonstrate the Agency's accountability for the monies it receives. If you have questions about this report or need additional financial information, please contact: the Director of the Department of Financial Services, 144 Ferguson Road, Auburn, California, 95604. The report can also be found on the Agency's website at <a href="https://www.pcwa.net">www.pcwa.net</a>.

Change in fair value of investments		103,753

Notes to Basic Financial Statements For the year ended December 31, 2018

# 1. Summary of Significant Accounting Policies

## A. Description of the Primary Government and Reporting Entity

The Placer County Water Agency (the Agency) was formed by a special act of the California State Legislature in 1957 for the purpose of developing adequate water supplies for the County of Placer (the County). The Agency's boundaries are coterminous with the borders of the County, and until January 16, 1975, the Board of Supervisors of Placer County constituted the Board of Directors of the Agency. On July 1, 1975, Placer County Water Agency was designated as successor to Placer County Water Works No. 1 and assumed all of its assets and obligations. The Agency is legally separate and fiscally independent of the County; hence, is not a component unit of the County. The Agency owns water rights on the Middle Fork of the American River, which are used for the generation of electricity through its hydroelectric facilities, and to supply water to Placer County. The Agency provides water treatment and the distribution of both untreated and treated water to customers in Placer County. The Agency's generated power is sold directly to the California Independent System Operator (CAISO), while energy products are sold through bilateral contracts.

The Agency's financial statements present the Agency and its one component unit, the Placer County Water Agency Public Facilities Corporation.

### B. Description of the Component Unit

The Agency has one component unit, the Placer County Water Agency Public Facilities Corporation (the Corporation), which is considered a blended component unit as it meets the criteria to be classified as a blended component unit.

Reporting for a component unit on the Agency's financial statements can be blended or discretely presented. A blended component unit, although a legally separate entity, is in substance, part of the Agency's obligations. A blended component unit is an extension of the Agency and so data from this unit is combined with data of the Agency. A discretely presented component unit, on the other hand, is reported in a separate column in the financial statements to emphasize it is legally separate from the Agency.

The Agency's Board of Directors serves as the Corporation's Board of Directors. The purpose of the Corporation is to provide financial assistance to the Agency by financing the acquisition, construction, improvement, and remodeling of capital projects and facilities. Debt financed by the Corporation is reflected as debt of the Agency. The Corporation does not issue separate financial statements.

## C. Basis of Presentation

The accounts of the Agency are organized and operated on a fund basis. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, deferred outflows of resources, liabilities, deferred inflows of resources, net position, revenues and expenses.

All activities of the Agency are accounted for within proprietary (enterprise) funds. Proprietary funds are used to account for operations that are (a) financed and operated in a manner similar to

Notes to Basic Financial Statements For the year ended December 31, 2018

private business enterprises where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

## D. Basis of Accounting

Proprietary funds are accounted for on a flow of economic resources measurement focus, using the accrual basis of accounting. Under this method, all assets, and deferred outflows of resources; and liabilities and deferred inflows of resources associated with operations are included on the statement of net position, and revenues are recorded when earned and expenses are recorded at the time the liabilities are incurred.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operation. The principal operating revenues of the Agency are charges to customers for sales and services. The Agency's operating revenues, such as charges for services or energy sales result from exchange transactions associated with the principal activities of the Agency. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

**Statement of Net Position** – The statement of net position is designed to display the financial position of the Agency. The Agency's net position is segregated into three categories defined as follows:

- Net Investment in Capital Assets This component of net position consists of capital assets, including restricted capital assets, net of accumulated depreciation and deferred outflows of resources; reduced by the outstanding balances of debt and deferred inflows of resources that are attributable to the acquisition, construction or improvement of these assets. This investment in capital assets is considered non-expendable.
- Restricted Net Position This component of net position consists of constraints placed on net position use through external constraints imposed by creditors (such as through debt covenants), grantors, contributors or laws or regulations of other governments. It also pertains to constraints imposed by law or constitutional provisions or enabling legislation.
- Unrestricted Net Position This component of net position consists of net position that does not meet the definition of "restricted" or "net investment in capital assets". Amounts included as unrestricted net position are available for designation for specific purposes as established by the Agency's Board of Directors.

Statement of Revenues, Expenses and Changes in Net Position – The statement of revenues, expenses and changes in net position is the operating statement for proprietary funds. Revenues are reported by major source. These statements distinguish between operating and non-operating

Notes to Basic Financial Statements For the year ended December 31, 2018

revenues and expenses and present a separate subtotal for operating revenues, operating expenses, and non-operating revenues (expenses).

## E. Cash and Cash Equivalents

For purposes of the statement of cash flows, the Agency considers all highly liquid investments (including restricted assets) with original maturities of three months or less at the date of purchase to be cash equivalents.

### F. Investments

Investments are stated at fair value. Included in investment income (loss) is the net change in the fair value of investments, which consists of the realized gains and losses and the unrealized appreciation (depreciation) of those investments.

### G. Water Service Receivable

Water service receivables are presented net of \$109,483 in allowance for doubtful accounts as of December 31, 2018. Customer water meters are read on a cyclical basis throughout a monthly or bimonthly period. Revenue is recognized in the period that the water is used.

## H. Materials and Supplies

Materials and supplies consist of water meters, pipe, valves and other items for system maintenance and are valued at cost, which approximates market, using the weighted average cost method.

### I. Capital Assets

The Agency's capital assets purchased or constructed are capitalized at historical cost, while contributed assets are recorded at acquisition value at the time received for assets with an individual cost of more than \$5,000 and a useful life of one year or greater.

The purpose of depreciation is to spread the cost of capital assets over the life of the assets. The amount charged to depreciation expense each year represents that year's pro rata share of depreciable capital assets.

Depreciation of all capital assets in service, excluding land, is charged as an expense against operations each year and the total amount of depreciation taken over the years, called accumulated depreciation, is a reduction in the book value of the capital assets.

Capital assets are depreciated using the straight-line method of depreciation over the useful life of the asset. The Agency has assigned the useful lives listed below to capital assets:

Dams, tunnels and waterways	40-100 years
Reservoirs	40 years
Treatment and pumping plants, transmission and distribution	40 years
Heavy equipment	10 years
Vehicles, tools, shop and office equipment and furniture	5 years

Notes to Basic Financial Statements For the year ended December 31, 2018

### J. Compensated Absences

Compensated absences are accrued and reported as a liability in the period earned. Amounts payable as of December 31, 2018 are included on the statement of net position.

### K. Property Tax Revenue

Property tax in California is levied in accordance with Article XIII A of the State Constitution. The property taxes are placed in a pool, and then allocated to the local governments. Property tax revenue is recognized in the year in which taxes are levied.

The property tax calendar is as follows:

Lien date: January 1 Levy date: July 1

Due date: First installment – November 10

Second installment – February 10

Delinquent date: First installment – December 11

Second installment – April 11

The Agency's property taxes are billed, collected and distributed to the Agency by the County. Starting with the 1993-94 tax year, the County implemented the Teeter Plan. As such, the Agency receives 100 percent of the secured property tax levied to which it is entitled, whether or not collected. The Agency accrues property tax revenues in the year levied and the County pays the property taxes to the Agency at the following proportions and months: 55% in December, 40% in April and 5% in June.

For the year ending December 31, 2018, the Agency's property tax revenue totaled \$1,054,705 which is included in the Agency Wide Division.

## L. Water Connection Charge

Water Connection Charges (WCC) are charged for service connection to the treated water system and are recorded as revenue when received. WCC revenues are restricted by California Government Code for expansion to the existing water system and are committed for payments on the certificates of participation.

### M. Water Sales and Water Zones

The Agency has two types of water sales: 1) On-going retail and wholesale water sales of treated and untreated water to customers connected to the Agency's water system infrastructure; 2) Individual contracted one-time water sales to other water providers or the environmental water bank. The on-going water sales are recorded as operating revenue and the one-time water sales are recorded as non-operating revenue.

The Agency's Water Division was established with zones or service areas as the Agency acquired the territory. Zone 1 was established in 1968 and includes the area from just north of Auburn to Roseville. Zone 2 was established in 1979 and is a small area, about 100 acres, south of Roseville.

Notes to Basic Financial Statements For the year ended December 31, 2018

Zone 3 was established in 1982 and includes the area from Alta to Bowman (just north of Auburn). Zone 4 was established in the Martis Valley in 1996 and was transferred to Northstar Community Services District on October 1, 2015. Zone 5, established in 1998, includes the agricultural area in western Placer County.

On August 17, 2017, the Agency's Board of Directors adopted by Resolution, Zone 6, formally consolidating the Western Water System Zones 1, 2, 3, and 5. The water sources and infrastructure in each of these zones are inextricably tied to one another. The Agency's two principle water sources, its PG&E contracts and its Middle Fork Project (MFP) water rights, are fully integrated into the reliability of water delivery for all of the Agency's customers. The canal system, which stretches from Alta to Roseville, supplies water to Zones 1, 3 & 5, and is absolutely essential during periods when the PG&E system is out of service; the MFP supply flows directly to Zones 1, 2 & 5 but can also be used to back water supply into Zone 3; and the Zone 2 groundwater system was abandoned years ago and replaced with treated surface water from Zone 1.

In 2015, the Agency commissioned a consultant, Raftelis Financial Consulting, to perform a comprehensive Water Cost of Service and Rate Study (Study) across all Agency water services. The purpose of this Study was to (1) establish fair and equitable water rates for the Western Water System - Zone 6 that proportionately allocated the costs of providing service in accordance with California Constitution Article XIII D, Section 6 (commonly referred to as Proposition 218), (2) provide sufficient revenue based on costs, (3) ensure rates are based upon the costs to provide service to each customer class and each rate tier, and (4) produce an administrative record to support decisions made within the rate design. Following a public hearing held on November 2, 2017, the Agency's Board of Directors adopted a resolution on November 16, 2017 approving the Study's proposed rates, fees and charges, effective January 1, 2018, in order to establish uniform rates, fees and charges throughout the Agency's service area, consolidate some customer classifications, reduce the number of commodity tiers for many rate schedules, maintain a cost of service structure consistent with state law and industry standards, and allow for an annual inflation adjustment based on the Consumer Price Index for years 2019-2022, upon annual Board consideration and approval.

### N. Power Sales

During 2018, the Agency sold power to the California Independent System Operator (CAISO), while energy products were sold through bilateral contracts.

## O. Bond Discounts and Premiums

Original issue discounts and premiums related to the 2013, 2016 and 2018 certificates of participation are amortized using the bonds outstanding method over the life of the debt.

## P. Use of Estimates and Assumptions

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Notes to Basic Financial Statements For the year ended December 31, 2018

### Q. Pension

For purposes of measuring the net pension liability, deferred outflows and inflows of resources related to pensions, pension expense, information about the fiduciary net position and additions to/deductions from the fiduciary net position have been determined on the same basis as they are reported by the Agency. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Statement No. 68 of the Governmental Accounting Standards Board (GASB 68) requires that the reported results must pertain to liability and asset information within certain defined timeframes. For this report, the following timeframes are used:

Valuation Date June 30, 2017 Measurement Date June 30, 2018

Measurement Period July 1, 2017 to June 30, 2018

### R. Other Post-employment Benefits

For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Agency's plan (OPEB Plan) and additions to/deductions from the OPEB Plan's fiduciary net position have been determined on the same basis. For this purpose, benefit payments are recognized when currently due and payable in accordance with the benefit terms. Investments are reported at fair value.

Statement No. 75 of the Governmental Accounting Standards Board (GASB 75) requires that the reported results must pertain to liability and asset information within certain defined timeframes. For this report, the following timeframes are used:

Valuation Date June 30, 2017 Measurement Date June 30, 2018

Measurement Period July 1, 2017 to June 30, 2018

### S. Fair Value Measurements

Certain assets and liabilities are required to be reported at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants and the measurement date. The Agency categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The fair value hierarchy categorizes the inputs to valuation techniques used to measure fair value into three levels based on the extent to which inputs used in the measuring fair value are observable in the market and are described as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 inputs, other than quoted prices included within Level 1, which are observable for the asset or liability, either directly or indirectly.

Notes to Basic Financial Statements For the year ended December 31, 2018

Level 3 inputs are unobservable inputs for an asset or liability.

The Agency utilizes techniques consistent with market, cost, or income approaches to determine fair value. The most appropriate technique is utilized to maximize the use of observable inputs and minimize the use of unobservable inputs. Investments the Agency owns utilizing a \$1 per share are exempt from reporting under the fair value measurement levels.

# T. Deferred Outflows and Deferred Inflows of Resources

In addition to assets, the statement of net position and balance sheet will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position or fund balance that applies to a future period(s) and so will not be recognized as an outflow of resources (expense) until that time.

In addition to liabilities, the statement of net position and balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position or fund balance that applies to a future period and so will not be recognized as an inflow of resources (revenue) until that time.

## U. New Accounting Pronouncements

GASB Statement No. 75 – In June 2015, GASB issued Statement No. 75, Accounting and Financial Reporting for Post-Employment Benefits Other Than Pensions. This Statement establishes new accounting and financial reporting requirements for governments whose employees are provided with OPEB, as well as for certain non-employer governments that have a legal obligation to provide financial support for OPEB provided to the employees of other entities. The provisions in Statement No. 75 are effective for fiscal years beginning after June 15, 2017. The Agency has implemented the requirements of this Statement for year-ended December 31, 2018, which required a restatement to the Agency's financial statements for the year-ended December 31, 2017.

GASB Statement No. 85 – In March 2017, GASB issued Statement No. 85, Omnibus 2017. The objective of this Statement is to improve consistency in accounting and financial reporting by addressing practice issues that have been identified during implementation and application of certain GASB Statements. This Statement is effective for reporting periods beginning after June 15, 2017. The Agency has implemented the requirements of this Statement for year-ended December 31, 2018.

GASB Statement No. 89 – In June 2018, GASB issued Statement No. 89, Accounting for Interest Cost Incurred before the End of a Construction Period. This Statement requires that interest cost incurred before the end of a construction period be recognized as an expense in the period in which the cost is incurred for financial statements prepared using the economic resources measurement focus. As a result, interest cost incurred before the end of a construction period will not be included in the historical cost of a capital asset. The requirements of this Statement are effective for reporting periods beginning after December 15, 2019. The Agency has implemented the requirements of this Statement for year-ended December 31, 2018.

Notes to Basic Financial Statements For the year ended December 31, 2018

## 2. Cash and Investments

Cash and investments as of December 31, 2018 are classified in the accompanying financial statements as follows:

Statement of Net Position	tatement of Net	osition
---------------------------	-----------------	---------

Cash and Cash Equivalents	\$ 43,450,232
Restricted Cash and Cash Equivalents	20,770,279
Restricted Cash and Cash Equivalents with Fiscal Agents	2,831,256
Investments	70,729,711
Restricted Investments	 32,978,373
Total	\$ 170,759,851

Cash and investments as of December 31, 2018 consist of the following:

Cash on Hand	\$	3,300
Deposits with Financial Institutions		10,816,366
Investments	_	159,940,185
Total	\$	170,759,851

Notes to Basic Financial Statements For the year ended December 31, 2018

# Cash and Investments Restricted

Cash and investments restricted for debt service, cash held at third party fiscal agent, and restricted for other purposes as of December 31, 2018 are as follows:

Agency Wide Division:	
IRS Section 125 - Reserve for employees Section 125 account	\$ 14,965
Water Resource Development - Restricted for Water Resource	
Development Fund Activities	 444,604
Total Agency Wide Restricted	 459,569
Water Division:	
Held with Fiscal Agent Restricted for Debt Service	
2013 COP Debt Service	167,468
2016 COP Debt Service	468,998
2018 COP Debt Service	575,025
Auburn Water Treatment Plant Debt Service	1,274,830
Electric Street Tank Debt Service	 344,935
Total Held with Fiscal Agent Restricted for Debt Service	 2,831,256
Held at the Agency Restricted for Debt Service	
Electric Street (SRF) Loan - Restricted for Debt Service	212,050
Improvement Districts – Restricted for Debt Service	 58,737
Total Held at the Agency Restricted for Debt Service	270,787
Total Water Division Restricted for Debt Service	3,102,043
Held at the Agency Restricted Other by Law or Contract	
Water Connection Charges - Restricted for Water System Expansion	40,931,608
Water Connection Charges - Funded to Capital Projects	11,492,993
Cash in Escrow for Construction Contracts	333,685
City of Lincoln Pipeline – Restricted for City of Lincoln pipeline	174,730
County Service Area 29 – Restricted for Zone 5 improvements	81,573
Sunset Ranchos - Restricted for Regional Water Use Efficiency	3,707
Total Water Division Held at the Agency Restricted Other	53,018,296
Total Water Division Restricted	56,120,339
Total Restricted	\$ 56,579,908

Notes to Basic Financial Statements For the year ended December 31, 2018

Agency Investments Authorized by the California Government Code and the Agency's Investment Policy.

The California Government Code and the Agency's Investment Policy allow the Agency to invest in the following authorized and permitted investment types provided the approved percentage and maturities limits are not exceeded.

Authorized Investment Type	Maximum Maturity	Maximum in Portfolio*	Maximum Investment in One Issuer
U.S. Treasury Securities	5 years	100%	No limit
U.S. Government Agencies and Instrumentalities - Primary	5 years	100%	50%
U.S. Government Agencies and Instrumentalities - Secondary	5 years	50%	30%
State of California Notes/Bonds	5 years	25%	10%
Other States Notes/Bonds	5 years	25%	10%
Local Agencies of the State of California Notes/Bonds	5 years	30%	10%
Commercial Paper	270 days	25%	5%
Corporate or Medium-Term Notes	5 years	30%	5%
Money Market Mutual Funds	N/A	20%	5%
Bonds of Supranationals	5 years	15%	5%
Negotiable Certificates of Deposit	1 year	20%	5%
Repurchase Agreements	1 year	15%	5%
Banker's Acceptances	180 days	25%	5%
Placer County Treasurer's Pooled Investments (PCTPI)	N/A	100%	No limit
Local Agency Investments Fund (LAIF)	N/A	\$65 million	No limit
Collateralized Bank Deposits	5 years	100%	50%

<sup>\*</sup>Excluding amounts held by bond trustee that are restricted by debt agreement rather than California Government Code restrictions.

Investments of debt proceeds or reserve funds held by debt trustees or fiscal agents are governed by the provisions of debt agreements and are addressed in the following section.

Notes to Basic Financial Statements For the year ended December 31, 2018

## **Investments held by Debt Trustees Are Authorized by Debt Agreements**

The Agency must maintain required amounts of cash and investments with trustees or fiscal agents under the terms of certain debt issues. These funds are unexpended bond proceeds or are pledged reserves to be used if the Agency fails to meet its obligations under these debt issues. The California Government Code requires these funds to be invested in accordance with Agency resolutions, bond indentures or State statutes. The table below identifies the investment types that are authorized for investments held by debt trustees and certain provisions of these debt agreements.

Authorized Investment Type	Maximum Maturity	Maximum in Portfolio	Maximum Investment in One Issuer
U.S. Treasury Securities	None	100%	No limit
U.S. Government Agencies and Instrumentalities	None	100%	No limit
Banker's Acceptances	1 Year	100%	No limit
Commercial Paper	None	100%	No limit
Money Market Mutual Funds	N/A	100%	No limit
Investment Contracts	Maturity of debt	100%	No limit
Local Agency Investments Fund (LAIF)	None	100%	No limit
Repurchase Agreements	30 days	100%	No limit
California Arbitrage Management Trust	None	100%	No limit

Notes to Basic Financial Statements For the year ended December 31, 2018

#### **Interest Rate Risk**

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Normally, the longer an investment's maturity, the greater the sensitivity of its fair value to changes in market interest rates. The Agency's investment policy states that interest rate risk will be mitigated by:

- (a) Structuring the Agency's portfolio so that securities mature to meet the Agency's cash requirements for ongoing obligations, thereby reducing the possible need to sell securities on the open market and incurring a possible loss prior to their maturity to meet those requirements; and
- (b) Managing the overall average maturity of the portfolio on a shorter term to maturity basis, not to exceed 2 ½ years.

Information about the sensitivity of the fair value of the Agency's investments (including investments held by bond trustees) to market interest rate fluctuations is provided by the following table that shows the distribution of the Agency's year-end investments by maturity:

		Remaining Maturity				
	Fair	12 Months	13 to 24	25 to 36	37 to 48	49 to 60
Investment Type	Value	Or Less	Months	Months	Months	Months

### **Credit Risk**

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of credit quality ratings by a nationally recognized statistical rating organization. Presented below is the minimum authorized rating requirement at the time of purchase, where applicable, by the California Government Code, the Agency's investment policy, or debt agreements. Also, presented below are the December 31, 2018 actual credit quality ratings for each investment type as provided by Moody's Investor Services, Inc.

Notes to Basic Financial Statements For the year ended December 31, 2018

		Minimum Rating a			g as of Year-End		
Investment Type	Fair Value	Authorized Rating	Aaa**	Aa	Not Rated		
U.S. Treasury Securities	\$ 20,741,610	n/a	20,741,610

Total	\$ 159,940,185		91,687,150	8,873,070	59,379,965		

<sup>\*</sup> Collateralized

The Agency's investment policy states that credit risk will be mitigated by:

- (a) Limiting investments to only the most creditworthy types of securities;
- (b) Pre-qualifying the financial institutions with which the Agency will do business; and
- (c) Diversifying the investment portfolio so that the potential failure of any one issue or issuer will not place an undue financial burden on the Agency.

### **Concentration of Credit Risk**

Concentration of credit risk is the risk of loss attributed to the magnitude of an entity's investment in a single issuer. The Agency's investment policy follows California Government Code regarding limitations on the amount that can be invested in any one investment type and does not further limit investments in any one issuer. Agency investments in the securities of any individual issuer, other than U.S. Treasury securities, LAIF, County Treasurer and mutual funds that represent 5% or more of total Agency investments are as follows:

	Investment	Percent of	Reported
<u>Issuer</u>	Type	<u>Portfolio</u>	<u>Amount</u>
Federal Farm Credit Bank	U.S. Government Agencies - Primary	16.86%	\$ 26,971,470
Federal Home Loan Bank	U.S. Government Agencies - Primary	13.17%	21,062,850

### **Custodial Credit Risk**

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a

<sup>\*\*</sup> Includes Standard & Poor's AAA rating of Money Market Funds (AAAm)

Notes to Basic Financial Statements For the year ended December 31, 2018

government will not be able to recover the value of its investment or collateral securities that are in the possession of another party.

California Law and the Agency's investment policy require banks and savings & loan institutions to pledge government securities with a market value of 110% of the Agency's cash on deposit as collateral for deposits. The third party bank trustee agreement must comply with California Government Code, which requires that a financial institution secure deposits made by state or local governmental units by pledging securities in an undivided collateral pool held by a depository regulated under state law (unless so waived by the governmental unit). The market value of the pledged securities in the collateral pool must equal at least 110% of the total amount deposited by the public agencies. The Agency's investment policy states all securities owned by the Agency shall be held in safekeeping by a third party bank trust department acting as an agent of the Agency under the terms of the custody agreement.

The Agency invests in individual investments and in two investment pools (LAIF and the PCTPI). Individual investments are evidenced by specific identifiable securities instruments, or by an electronic entry registering the Agency as the owner in the "book entry" recording system. In order to increase security, the Agency employs the Trust Department of a bank or trustee as the custodian.

The Agency's deposits with financial institutions in excess of the Federal Depository Insurance Corporation limits total \$13,060,635 which is collateralized at a rate of 110% with securities held by the pledging financial institution's Trust Department but not in the Agency's name.

## **Investment in State Investment Pool – Local Agency Investment Fund**

The California State Treasurer maintains an investment pool in a special fund through which local governments may pool investments. The investment pool is named the Local Agency Investment Fund (LAIF). The Agency is a voluntary participant in the LAIF that is regulated by the California Government Code Section 16429 under the oversight of the Treasurer of the State of California and the Local Investment Advisory Board (Advisory Board). The Advisory Board consists of five members as designated by State Statute.

The Agency reports its investment in LAIF at the fair value amount provided by LAIF, which is the same as the value of the pool share. The balance available for withdrawal is the Agency's proportionate share of its investment in the LAIF, which amounted to \$36,471,367 at December 31, 2018.

Included in the LAIF's investment portfolio at December 31, 2018, are collateralized mortgage obligations, mortgaged backed securities, and other asset-backed securities, structured notes, loans to certain state funds, and floating rate securities issued by federal agencies, government-sponsored enterprises, U.S. Treasury Notes and Bills and corporations. At December 31, 2018, the amount invested by public agencies in the LAIF totaled \$83,263,107,776, which includes asset-backed securities totaling \$1.45 billion (1.75%). At December 31, 2018, the LAIF investments mature in an average of 192 days.

Notes to Basic Financial Statements For the year ended December 31, 2018

## **Investment in Placer County Treasurer's Pooled Investments**

The Placer County Treasurer-Tax Collector maintains an investment pool in a special fund through which local agencies may pool investments. The investment pool is named the Placer County Treasurer's Pooled Investments (PCTPI). The Agency is a voluntary participant in the PCTPI that is regulated by the California State and Federal Laws and Regulations and under the oversight of the Treasurer's Review Panel. The Treasurer's Review Panel consists of four members as designated by Placer County Treasurer's Statement of Investment Policy.

The Agency reports its investment in the PCTPI at the value provided by the Placer County Treasurer-Tax Collector, which is valued at amortized cost. The balance available for withdrawal is the Agency's proportionate share of its investment in the Pool, which amounted to \$16,929,478 at December 31, 2018.

The investment of money on deposit in the PCTPI is limited to those investments specified by California Government Code Section 53601 and 53635. Included in the PCTPI at December 31, 2018, are securities issued by federal agencies, structured notes, and floating rate securities issued by federal agencies, government-sponsored enterprises, U.S. Treasury Notes and Bills and corporations. At December 31, 2018, the amount invested by all public agencies in the PCTPI totaled \$1,725,214,125, which includes Federal Agency Coupons totaling \$970 million (56.6%) and corporate medium term notes totaling \$79 million (4.6%). At December 31, 2018, the average days to maturity was 1,038 days.

Notes to Basic Financial Statements For the year ended December 31, 2018

### Fair Value Measurement

The Agency categorizes its fair value investments within the fair value hierarchy established by generally accepted accounting principles. The Agency has the following recurring fair value measurements as of December 31, 2018:

rarchy
Level 3
10
74
20
10
74 -
2

Investments with Uncategorized Inputs	Amount
PCTPI	16,929,478
LAIF	36,471,367
Money Market - Held by Bond Trustee	2,831,256
Total Investments Measured Uncategorized	56,232,101
Total Investments	\$ 159,940,185

All securities classified in Level 2 are valued using pricing models based in market data, such as matrix or model pricing from outside pricing services. Deposits and withdrawals in governmental investment pools, such as LAIF and PCTPI Investment Pools, are made on the basis of \$1 and not fair value. Accordingly, the Agency's measured fair value of its proportionate share in these types of investments is based on uncategorized inputs not defined as a Level 1, Level 2, or Level 3 input.

Notes to Basic Financial Statements For the year ended December 31, 2018

# 3. Summary of Capital Assets

Plus: Unamortized bond discounts and premiums				6,242,573
Total long-term debt				\$ 82,153,215

<sup>\*</sup> ID No. 10 & 11 warrants have reached maturity, yet certain warrants have not been presented for payment, hence they remain as a liability.

Notes to Basic Financial Statements For the year ended December 31, 2018

The following is a summary of changes in long-term obligations for the year ended December 31, 2018:

	Balance 1/1/2018	Additions	Retirements	Balance 12/31/2018	Amounts Due Within One Year
Certificates of Participation	\$ 61,600,000	23,235,000	33,030,000	51,805,000	2,680,000
Loans Payable	19,607,187	-	1,298,499	18,308,688	1,328,472
Improvement District Debt	2,329			2,329	
Subtotal	81,209,516	23,235,000	34,328,499	70,116,017	4,008,472
Compensated Absences	5,683,952	2,476,430	2,365,757	5,794,625	3,715,536
Totals	\$ 86,893,468	25,711,430	36,694,256	75,910,642	7,724,008

## **Certificates of Participation**

All outstanding Certificates issuances represent undivided fractional interests in installment payments made, between the Agency and the Placer County Water Agency Public Facilities Corporation (Corporation) as the purchase price for certain additions and improvements as specified below in the individual Certificate issues.

Pursuant to the terms of each Certificate purchase contract, the Agency has pledged, on a parity basis, the water revenues of the Agency's Western Water System to the payment of the 2008, 2013, 2016 and 2018 Certificates and other parity debt.

# 2008 Certificates

On April 24, 2008, Certificates of Participation (2008 Certificates) were issued by the Agency in the amount of \$40,385,000 to refinance the outstanding 2005 Certificates. The 2008 Certificate proceeds were used entirely to refinance the 2005 Certificates (originally issued in 1998 to fund the Cross Basin Pipeline II), fund the \$3.4 million debt service reserve, pay the termination cost of the interest rate swap and pay the associated issuance costs. The 2008 Certificates have an average coupon rate of 4.55% and a fixed rate coupon range from 3.0% to 4.75%. In April 2018, the 2008 Certificates were defeased with the issuance of the 2018 Certificates of Participation, the principal outstanding at December 31, 2018 is \$0.

## 2013 Certificates

On June 19, 2013, Certificates of Participation (2013 Certificates) were issued by the Agency in the amount of \$8,100,000 with a reoffering premium of \$1,304,896 to refund the outstanding \$9,170,000 2003 Certificates (originally issued in 1993 to fund the Foothill Water Treatment Plant upgrade to 27 million gallons per day (MGD), a 10 MGD clearwell and refinance the Series B). The 2013 Certificates were issued with an average coupon of 4.65% and a fixed coupon range from 4.0% to 5.0%. The 2013 Certificate proceeds were used entirely to refund the 2003 Certificates and pay the associated issuance costs. The principal outstanding at December 31, 2018 is \$4,515,000.

Notes to Basic Financial Statements For the year ended December 31, 2018

## 2016 Certificates

On May 19, 2016, Certificates of Participation (2016 Certificates) were issued by the Agency in the amount of \$24,840,000 with a reoffering net premium of \$3,002,617 to advance refund a portion of the outstanding 2007 Certificates in the amount of \$26,725,000 (originally issued to fund: 1) the construction of the Auburn Ravine Tunnel Pump Station, an addition to the water system in the amount of approximately \$20 million, and 2) the rehabilitation of existing water system infrastructure including portions of the Boardman canal, Bowman canal siphon and other projects in the amount of approximately \$13 million). The 2016 Certificates were issued with an average coupon of 3.536% and a fixed coupon range from 2.375% to 5.0%. The principal outstanding at December 31, 2018 is \$24,055,000.

# 2018 Certificates

On April 4, 2018, Certificates of Participation (2018 Certificates) were issued by the Agency in the amount of \$23,235,000 to refund the outstanding 2008 Certificates in the amount of \$31,470,000. The 2018 Certificates were issued with an average coupon 4.8% and a fixed coupon range from 4% - 6% over a twelve year period maturing July 2029. The refunding was performed to save total debt service costs and saved an average of \$770,000 annually or \$8.9 million in gross savings over twelve years with a net economic gain of \$7.8 million. The present value savings of the refunding totaled \$4.3 million and the borrowing had a True Interest Cost of 2.265%. The reasons the par amount of the 2018 Certificates is \$8.235 million less than the outstanding 2008 Certificates is three-fold: 1) A springing amendment included with the 2016 Certificates became effective with this financing thus eliminating the need to fund a debt service reserve fund for the 2018 Certificates and thereby allowing for the release of the existing \$3.5 million debt service reserve fund associated with the 2008 Certificates. These monies were then contributed to the refunding and used to defease the 2008 Certificates, 2) the coupon/yield structure of the 2018 Certificates generated an aggregate premium for the securities of \$4,051,904, which was also applied to the defeasance of the 2008 Certificates, and 3) the lower interest rates. The principal outstanding at December 31, 2018 is \$23,235,000.

# Certificates of Participation Debt Covenants

The Certificates of Participation purchase contracts require the Agency to ensure that:

- (1) the net water revenues shall be at least 120% of debt service on all outstanding contracts and bonds,
- (2) the net water revenues shall be at least 100% of debt service on all outstanding contracts and bonds plus the obligation service for all outstanding obligations, and
- (3) the certificates reserve requirements shall be met.

Pursuant to the Agency's rate covenant within the debt documents, in calculating net water revenue, no deduction for depreciation or amortization is to be made.

The following calculation indicates the Agency's compliance with these criteria for the year ended December 31, 2018.

Notes to Basic Financial Statements For the year ended December 31, 2018

Data related to Western Water System area (excluding Improvement Districts):

## **Loans Payable**

California Department of Health Services Loan – Auburn Water Treatment Plant

In 2007, the Agency entered into a loan agreement with the Department of Health Services in an amount not to exceed \$20,000,000. The purpose of the loan was to finance the upgrades to the Auburn Water Treatment Plant. The principal and interest are payable from Water System revenue. The principal outstanding at December 31, 2018 is \$11,627,606.

California Department of Health Services Loan – Electric Street

In 2012, the Agency entered into a loan agreement with the Department of Health Services in an amount not to exceed \$7,801,000. The purpose of the loan was to finance the upgrades to the Electric Street Water Tank. The principal and interest are payable from Water System revenue. The principal outstanding at December 31, 2018 is \$6,681,082.

### **Improvement District Debt**

From time to time, in order to finance water system construction and improvements, property owners have formed improvement districts. Upon request and approval of the affected property owners, which are deemed to benefit from the improvements, the properties are issued special assessment warrants and special assessments are levied. The warrants are the responsibility of the individual improvement district and the principal and interest are payable solely from the property assessments levied.

The following summarizes the individual improvement districts with debt outstanding and warrants payable balances at December 31, 2018:

Notes to Basic Financial Statements For the year ended December 31, 2018

Improvement District No. 10 (Aguilar Road)

In 1977, warrants totaling \$77,400 were issued for the purpose of financing the installation of pipeline, fire hydrants and other facilities on Aguilar Road. Final maturity of the warrants was July 1998. However, not all warrants have been presented for payment, and therefore, these unpresented amounts are carried as a liability in the financial statements. The unpresented and outstanding warrants principal balance at December 31, 2018 is \$1,134.

Improvement District No. 11 (Lakeshore)

In 1978, warrants totaling \$178,044 were issued for the purpose of financing improvements to Lakeshore Mutual Water Company's water system. Final maturity of the warrants was July 1989. However, not all warrants have been presented for payment, and therefore, these unpresented amounts are carried as a liability in the financial statements. The unpresented and outstanding warrants principal balance at December 31, 2018 is \$1,195.

# **Debt Service Requirements**

As of December 31, 2018, annual debt service requirements (excluding matured debt and compensated absences) to maturity are as follows:

Year Ending	Certificates of Participation		Loans Payable		
December 31:	Principal	Interest	Principal	Interest	
2019	\$ 2,680,000	2,241,619	1,328,472	412,859	
2020	2,800,000	2,094,044	1,359,138	382,194	
2021	2,960,000	1,944,644	1,390,511	350,821	
2022	3,095,000	1,793,269	1,422,608	318,724	
2023	3,250,000	1,634,644	1,455,446	285,885	
2024-2028	19,975,000	5,376,844	7,796,956	909,702	
2029-2033	10,500,000	1,523,009	2,838,597	232,686	
2034-2038	6,545,000	391,525	716,960	16,578	
	\$ 51,805,000	16,999,598	18,308,688	2,909,449	

# **Future Water Revenues Pledged**

The pledge of future Water Revenues ends upon repayment of the Senior, Second Senior, and Parity long-term debt obligations with remaining debt service as of December 31, 2018, totaling \$90.0 million as follows:

• Second Senior obligations with remaining debt service totaling \$68.8 million for the 2013, 2016 and 2018 Certifications of Participation, which is scheduled to be repaid in 2037.

Notes to Basic Financial Statements For the year ended December 31, 2018

 Parity debt obligations with remaining debt service totaling \$21.2 million for the Auburn Water Treatment Plant and Electric Street Tank State Revolving Fund (SRF) loans with the State Water Resources Control Board, which is scheduled to be repaid in 2035.

For fiscal year 2018, Water Fund Revenues including operating and non-operating revenues amounted to \$67.2 million and operating costs including operating expenses, but not interest, depreciation or amortizations amounted to \$37.5 million represented coverage of 4.28 over the \$6.9 million in debt service.

## **Operating Leases**

The Agency has entered into various operating leases for buildings and equipment with lease terms in excess of one year. None of these agreements contain purchase options. Future minimum lease payments under these agreements as of December 31, 2018, are as follows:

Year Ending		Lease		
December 31,	P	Payments		
2019	\$	51,627		
2020		39,226		
2021		21,138		
	\$	111,991		

Total costs of such leases were \$77,208 for the year ended December 31, 2018.

IRS Section 125 – Reserve for employees Section 125 account

## 5. Restricted Net Position

As of December 31, 2018 the Agency, including improvement districts, had the following restrictions to net position:

14,965

\$

## **Agency Wide Division:**

Water Resource Development – Restricted for Water Resource	ŕ
Development Fund Activities	 444,604
Total Agency Wide	 459,569
Water Division:	
Water Connection Charges – Restricted for Water System Expansion	52,424,601
Improvement Districts – Restricted for Debt Service	24,830
Cash and Investments – Restricted for Specific Purposes	 805,745
Total Water	 53,255,176
Total All Funds – Restricted Net Position	\$ 53,714,745

Notes to Basic Financial Statements For the year ended December 31, 2018

## **6.** Water Supply Contracts

The Agency obtains its water supply from several sources:

- Up to 100,400 acre-feet (AF) of water per year from its Western Water Supply contract with PG&E, which is almost exclusively gravity fed;
- Up to 25,000 AF of water per year from its Zone 3 Water Supply contract with PG&E, which is gravity fed;
- Up to 120,000 AF of water per year from appropriated water rights developed through construction of the Agency's 1963 Middle Fork Project, which is gravity fed and pumped;
- Up to 35,000 AF of water per year from the U.S. Bureau of Reclamation's Central Valley Project pursuant to a 1970 contract, amended in 2011. The Agency has never drawn on this source.
- Up to 2,000 AF of water per year from wells in Western Placer County.

Western PG&E Water Supply Contract (Formerly Zone 1)

The Western Water Supply is from PG&E pursuant to the 1968 Zone 1 Water Supply contract under which water is provided to the Agency from the Yuba and Bear Rivers through PG&E's Drum-Spaulding Project. The Drum-Spaulding Project consists of several reservoirs and a series of canals, tunnels and hydroelectric generation facilities. Nearly all of the water the Agency delivers to its treated and untreated water customers in the lower Zone 6 comes from PG&E.

The Western Water Supply contract was originally executed on June 18, 1968 with PG&E and allowed the Agency to take delivery of up to a maximum of 100,400 AF per year from specified diversion points along the canal system at prices ranging from \$1.45 to \$3.93 per AF. The Agency and PG&E approved an agreement that extended the term of the 1968 agreement at a new price of \$30 per AF effective January 1, 2014 and \$40 per AF effective January 1, 2015. The agreement contains an annual price escalator based on the Consumer Price Index. In 2018, the price for this water was \$42.13 per AF.

# Zone 3 PG&E Water Supply Contract

In 1982, the Agency entered into its Zone 3 Water Supply contract with PG&E to acquire treated and untreated water systems serving the portion of upper Placer County that is adjacent to Interstate 80 from Alta, down through Colfax, to the Eastern boundary of Zone 1, just above Auburn. Along with the acquired treated and untreated water systems, the Agency acquired the right to purchase up to 25,000 AF annually from PG&E for use within Zone 3. This water, like the Western PG&E Water Supply contract, is sourced from PG&E's Drum-Spaulding Project.

Deliveries to the Agency under the Zone 3 Water Supply contract are made at Alta Tailrace and Alta Forebay. The Agency incurs no charge for deliveries made available by PG&E of 13,000 AF or less in any water year. For water deliveries of more than 13,000 AF, the water price is set by the California Public Utilities Commission.

Under the Zone 3 Water Supply contract, the Agency receives conservation credits for operating the Zone 3 system to conserve water and decrease delivery requirements below 11,000 AF per year. The Agency has not yet exceeded delivery of 13,000 AF in any water year and has, therefore, incurred no charge for deliveries under the contract.

Notes to Basic Financial Statements For the year ended December 31, 2018

### Middle Fork Project Water Rights

In addition to the two PG&E water supply contracts, the Agency has up to 120,000 AF of water available annually from appropriated water rights developed through the construction of the 1963 Middle Fork Project on the American River. The Middle Fork Project consist of two storage reservoirs and five diversion dams, five power plants, diversion and water transmission facilities, five tunnels and related facilities. Middle Fork Project water can be diverted into the western water system through the American River Pump Station to Auburn tunnel and from Folsom Reservoir. In addition to serving the western water system, this source can be sold to out of county water purveyors pursuant to a 2000 Water Forum Agreement.

## 7. Defined Benefit Pension Plan

### Plan Description

The Agency contributes to the California Public Employees' Retirement System (CalPERS), an agent multiple-employer public employee retirement system defined benefit pension plan that acts as a common investment and administrative agent for participating public entities within the State of California. Copies of CalPERS' annual financial report may be obtained from their Executive Office: 400 P Street, Sacramento, California 95814.

All qualified permanent and probationary employees are eligible to participate in the Local Government's Miscellaneous Plan, administered by the California Public Employees' Retirement System (CalPERS), which acts as a common investment and administrative agent for its participating member employers. Benefit provisions under the Plan are established by State statute and Local Government resolution. CalPERS issues publicly available reports that include a full description of the pension plan regarding benefit provisions, assumptions, and membership information that can be found on the CalPERS website.

### Benefits Provided

CalPERS provides service retirements and disability benefits, annual cost of living adjustments and death benefits to plan members, who must be public employees and beneficiaries. Benefits are based on years of credited service, equal to one year of full time employment.

The Public Employees' Pension Reform Act (PEPRA) of 2013 was created with the passing of Assembly Bill 340 (AB 340) signed by the Governor on September 2012. PEPRA implemented new benefit formulas, final compensation period and new contribution requirements for new employees hired on or after January 1, 2013, who meet the definition of "new member" under this bill.

## **Funding Policy**

The Agency currently makes a portion of the contributions required of Agency "Classic" employees on their behalf and for their account. The contribution rates below are set by statute and therefore, generally remain unchanged from year to year. The present actuarially determined rates of annual covered payroll are as follows:

Notes to Basic Financial Statements For the year ended December 31, 2018

Category	Classic Member Rates as a Percentage of Wages	PEPRA Member Rates as a Percentage of Wages
Local miscellaneous members	8.00%	6.25%

The contribution requirements of the plan members are established by State statutes and the employer contribution rate is established and may be amended by CalPERS.

The table below reflects the Plans' provision and benefits in accordance with PEPRA at June 30, 2018, are summarized as follows:

Ilima Data	Prior to	On or after
Hire Date	January 1, 2013	January 1, 2013
Benefit formula	2.7% @ 55	2% @ 62
Benefit vesting schedule	5 year service	5 year service
Benefit payments	monthly for life	monthly for life
Retirement age	50-55	52-67
Monthly benefits, as a % of eligible compensation	2.0% to 2.7%	1.0% to 2.5%
Required employee contribution rates	8%	6.25%
Required employer contribution rates	23.71%	23.71%

## **Employees Covered**

As of the June 30, 2018 measurement date, the following employees were covered by the benefit terms for each Plan:

Active employees	216
Inactive employees or beneficiaries currently receiving benefits	180
Inactive employees entitled to but not yet receiving benefits	62
Total	458

## Contribution Description

Section 20814(c) of the California Public Employees' Retirement Law (PERL) requires that the employer contribution rates for all public employers are determined on an annual basis by the actuary and shall be effective on July 1 following notice of a change in the rate. The total plan contributions are determined through the CalPERS annual actuarial valuation process. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and the contribution rate of employees. Employer contribution rates may change if plan contracts are amended. Payments made by the employer to satisfy contribution requirements that are identified by the pension plan terms as plan member contributions.

Notes to Basic Financial Statements For the year ended December 31, 2018

## Actuarial Methods and Assumptions used to determine Total Pension Liability

The June 30, 2017 valuation was rolled forward to determine the June 30, 2018 total pension liability, based on the following actuarial methods and assumptions:

Actuarial Cost Method Entry Age Normal in accordance with the requirements

of GASB 68

**Actuarial Assumptions** 

Discount Rate 7.15% Inflation 2.50%

Salary Increases Varies by Entry Age and Service

Payroll Growth 3.00%

Mortality Rate Table<sup>1</sup> Derived using CalPERS' Membership Data for all Funds Post Retirement Benefit Increase Contract COLA up to 2.0% until Purchasing Power

Protection Allowance Floor on Purchasing Power

applies, 2.5% thereafter

<sup>1</sup> The mortality table used was developed based on CalPERS' specific data. The table includes 15 years of mortality improvements using the Society of Actuaries Scale 90% of scale MP 2016. For more details on this table, please refer to the December 2017 experience study report (based on CalPERS demographic data from 1997 to 2015) that can be found on the CalPERS website.

All other actuarial assumptions used in the June 30, 2017 valuation were based on the results of an actuarial experience study for the period from 1997 to 2011, including updates to salary increase, mortality and retirement rates. The Experience Study report may be accessed on the CalPERS website at www.calpers.ca.gov under Forms and Publications.

#### Discount Rate

The discount rate used to measure the total pension liability was 7.15%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current member contribution rates and that contributions from employers will be made at statutorily required rates, actuarially determined. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

## Long-term Expected Rate of Return

The long-term expected rate of return on pension plan investments was determined using a buildingblock method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, CalPERS took into account both short-term and long-term market return expectations as well as the expected pension fund cash flows. Using historical returns of all of the funds' asset classes, expected compound (geometric) returns were calculated over the short-term (first 10 years) and the long-term (11+ years) using a building-block approach. Using the expected nominal returns for both short-term and long-term, the present value of benefits was

Notes to Basic Financial Statements For the year ended December 31, 2018

calculated for each fund. The expected rate of return was set by calculating the rounded single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equal to the single equivalent rate calculated above and adjusted to account for assumed administrative expenses.

The target allocation shown was adopted by the Board effective on July 1, 2018.

Asset Class <sup>1</sup>	Current Target	Real Return	Real Return
	Allocation	Years 1-10 <sup>2</sup>	Years 11+ <sup>3</sup>
Global Equity	50.0%	4.80%	5.98%
Fixed Income	28.0	1.00	2.62
Inflation Sensitive	-	0.77	1.81
Private Equity	8.0	6.30	7.23
Real Assets	13.0	3.75	4.93
Liquidity	1.0	0.00	-0.92

<sup>&</sup>lt;sup>1</sup>In the System's CAFR, Fixed Income is included in Global Debt Securities; Liquidity is included in the Short-term Investments; Inflation Assets are included in both Global EquitySecurities and Global Debt Securities.

<sup>&</sup>lt;sup>2</sup>An expected inflation of 2.0% used for this period

<sup>&</sup>lt;sup>3</sup>An expected inflation of 2.92% used for this period

Notes to Basic Financial Statements For the year ended December 31, 2018

## Changes in Net Pension Liability

The following table shows the changes in net pension liability recognized over the measurement period.

	Increase (Decrease)			
	Т	Ootal Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability $(c) = (a) - (b)$
Balance at: June 30, 2017				
(Valuation Date June 30, 2017)	\$	127,786,460	83,270,381	44,516,079
Changes recognized for the measurement period	d:			
Service Cost		3,420,889	-	3,420,889
Interest on the Total Pension Liability		8,983,417	-	8,983,417
Changes of Benefit Terms		-	-	-
Changes of Assumptions		(842,114)	-	(842,114)
Differences between Expected and				
Actual Experience		(103,164)	-	(103,164)
Plan to Plan Resource Movement		-	(209)	209
Contributions - Employer		-	4,433,239	(4,433,239)
Contributions - Employees		-	1,429,799	(1,429,799)
Net Investment Income		-	7,152,582	(7,152,582)
Benefit Payment, including Refunds				
of Employee Contributions		(5,818,876)	(5,818,876)	-
Administrative Expense		-	(129,758)	129,758
Other Miscellaneous Income/(Expense)		-	(246,413)	246,413
Net Changes		5,640,152	6,820,364	(1,180,212)
Balance at June 30, 2018				
(Measurement Date June 30, 2018)	\$	133,426,612	90,090,745	43,335,867

## Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the Plan as of the Measurement Date, calculated using the discount rate of 7.15 percent, as well as what the net pension liability would be if it were calculated using a discount rate that is 1 percentage-point lower (6.15 percent) or 1 percentage-point higher (8.15 percent) than the current rate:

_	Discount Rate		
	1% Decrease (6.15%)	Current Rate (7.15%)	1% Increase (8.15%)
Plan's Net Pension Liability/ (Asset)	\$60,902,843	43,335,867	28,743,568

Notes to Basic Financial Statements For the year ended December 31, 2018

## Subsequent Events

There were no subsequent events that would materially affect the results presented in this disclosure.

## Recognition of Deferred Outflows and Deferred Inflows of Resources

Under GASB 68, gains and losses related to changes in total pension liability and fiduciary net position are recognized in pension expense systematically over time.

The first amortized amounts are recognized in pension expense for the year the gain or loss occurs. The remaining amounts are categorized as deferred outflows and deferred inflows of resources related to pensions and are to be recognized in future pension expense.

The amortization period differs depending on the source of the gain or loss:

Difference between projected and actual earnings 5 years straight-line amortization

All other amounts

Straight-line amortization over the expected

average remaining service lifetime (EARSL) of all members that are provided with benefits (active, inactive, and retired) as of the

beginning of the measurement period

The expected average remaining service lifetime (EARSL) is calculated by dividing the total future service years by the total number of plan participants (active, inactive, and retired).

The EARSL for the Plan for the measurement period ending June 30, 2018 is 4.7 years, which was obtained by dividing the total service years of 2,142 (the sum of remaining service lifetimes of the active employees) by 458 (the total number of participants: active, inactive, and retired). Inactive employees and retirees have remaining service lifetimes equal to 0. Total future service is based on the members' probability of decrementing due to an event other than receiving a cash refund.

## Pension Expense and Deferred Outflows/Inflows of Resources Related to Pensions

As of the start of the measurement period (June 30, 2017), the NPL is \$44,516,079.

For the measurement period ending June 30, 2018 (measurement date), the Agency recognized a pension expense of \$5,944,767 for the Plan.

Notes to Basic Financial Statements For the year ended December 31, 2018

As of December 31, 2018, the Agency reports other amounts for the Plan as deferred outflow and deferred inflow of resources related to pensions as follows:

	Deferred outflows of resources		Deferred inflows of	
			resources	
Pension contributions subsequent to				
measurement date	\$	4,175,641		
Differences between Expected and Actual				
Experience		19,277	(386,075)	
Changes of Assumption		3,808,291	(831,544)	
Net Difference between Projected and				
Actual Earnings on Pension Plan Investments		-	(56,853)	
Total	\$	8,003,209	(1,274,472)	

The \$4,175,641 reported as deferred outflows of resources related to contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended December 31, 2019. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized as pension expense as follows:

Measurement period	Deferred	
Ended June 30:	Outflows/(Inflows) of	
Effect June 30.	Resources	
2019	\$ 2,039,653	
2020	1,421,673	
2021	(522,675)	
2022	(385,555)	
2023	-	
Thereafter	-	

## 8. Risk Management

The Agency has various operating exposures not limited to legal liability, tortious acts, injury to employees, and loss to physical property. In response to these exposures the Agency purchases insurance through a broker. The Agency carries Commercial Property, Boiler & Machinery and Business Interruption Coverage with scheduled and varying limits and deductibles. There are various other policies covering Public Officials, Crime, Cyber Liability, Pollution and other exposures. The Agency is a member of the Association of California Water Agencies-Joint Powers Insurance Authority (ACWA-JPIA), and participates in the property program for the Water Division while the Power Division purchases property coverage through a broker.

Notes to Basic Financial Statements For the year ended December 31, 2018

Coverage includes but is not limited to:

Coverage	Deductible
Workers' Compensation	\$100,000 (SIR)
Water CGL/Auto	\$25,000
Power CGL/Auto	\$25,000
Excess	Underlying policies
Water Property	\$10,000
Power Property	\$100,000

For Worker's Compensation, the Agency is self-insured and retains the risk for the first \$100,000 of a claim. Excess insurance coverage is purchased to cover claims in excess of \$100,000 up to the statutory limit set by the State of California.

The change in the Workers' Compensation claims liability, including claims incurred but not reported is based on an independent actuarial study prepared annually and was computed as follows:

	 2018	2017
Claims liability, beginning of the year	\$ 204,163	33,935
Current year claims	129,818	306,775
Change in prior year claims	(31,716)	(20,516)
Claims paid, current year claims	(8,851)	(116,031)
Claims paid, prior year claims	 (76,163)	
Claims liability, end of the year	\$ 217,251	204,163

The Agency has no additional liability accrued at December 31, 2018 based upon the requirements of GASB Statement No. 10 which requires that a liability for claims be reported if information prior to the issuance of the financial statements indicates that it is probable that a liability has been incurred at the date of the financial statements and that the loss can be reasonably estimated. There were no settlements in excess of the insurance coverage in any of the three prior fiscal years.

## 9. Joint Powers

American River Authority

On June 8, 1982, the Agency entered into a joint powers agreement with Placer County, El Dorado County and the El Dorado County Water Agency. In 1996, San Joaquin County also entered into the joint powers agreement. The agreement called for the formation of the "American River Authority." The purpose of this agreement is to provide for a joint exercise, through the authority of powers common to each of the parties, to study, develop, design, finance, acquire, construct, operate, maintain and replace dams, reservoirs, tunnels, conduits, hydroelectric facilities and any and all works related and incidental thereto on the American River between the Placer County Water Agency's Middle Fork American River Project and the Folsom Reservoir.

Notes to Basic Financial Statements For the year ended December 31, 2018

On June 25, 2018, the Board of Directors of the American River Authority by a unanimous vote of the members present, terminated the Joint Powers Agreement and thereby dissolved the Authority. Complete audited financial statements are available at the Agency's finance office.

Association of California Water Agencies – Joint Power Insurance Authorities

As discussed in Note 8, the Agency is a member of the Association of California Water Agencies – Joint Power Insurance Authority (JPIA). The JPIA's members have pooled funds to be self-insured for liability, property, underground storage tanks (UST), pollution liability, and workers compensation insurance. Placer County Water Agency is one of 370 member districts and participates in the property program only. Complete audited financial statements can be obtained at the JPIA's Office at 2100 Professional Drive, Roseville, California 95661-3700.

## Middle Fork Project Finance Authority

On January 10, 2006, the Agency entered into a Joint Powers Agreement (JPA) with the County. The agreement called for the formation of the "Middle Fork Project Finance Authority" (MFPFA) with the purpose to establish a joint organization to serve the mutual interests of the Agency and the County, exclusively, to provide for the financing of studies, programs, procedures, projects, services, improvements, modifications, and other costs that may be required to obtain a new Federal Energy Regulatory Commission (FERC) license or which may be completed under the current or subsequent FERC license of the Middle Fork Hydroelectric Project by the Agency, to approve Future Electrical Energy Sales, and to distribute revenues from Future Electrical Energy Sales. In March 2006, the MFPFA issued the MFPFA Revenue Bond, Series 2006 (Bond) in the amount of \$100 million to provide funds for relicensing costs and related expenses. Payment of principal and interest on the Bond commenced on October 1, 2015 from Middle Fork Project (Project) hydroelectric revenue received by the MFPFA. The Bond is secured by a pledge of Middle Fork Project hydroelectric revenue received and matures on April 1, 2036.

On May 1, 2013, the MFPFA began receiving electrical energy revenues and reimbursed the Agency's expenses related to the Project pursuant to the JPA. Power generation is sold directly to the CAISO market and energy products are sold through bilateral contracts.

Reimbursements for 2018 Agency expenses totaled \$35,460,053 which the Agency recorded as Power Sales Revenue as this is payment for energy the Agency sold.

Complete audited MFPFA financial statements are available at the Agency's finance office.

## **10. Construction Commitments**

At December 31, 2018 the Agency had ongoing construction commitments that totaled approximately \$12.5 million.

Notes to Basic Financial Statements For the year ended December 31, 2018

## 11. Other Post-Employment Benefits

## Plan Description

In addition to retirement benefits, the Agency provides other post-employment benefits (OPEB). The Placer County Water Agency Retiree Healthcare Plan (the Plan) is an agent multiple-employer defined benefit retiree healthcare plan. The plan provides healthcare benefits (medical) to certain employees who retire directly from the Agency on or after age 50 with at least five years of service, or retire for disability in accordance with State statutes and with various Agency Employee Associations' Memoranda of Understanding (MOU). On June 5, 2008, the Agency's Board passed a resolution to participate in the California Employers Retirees Benefit Trust (CERBT), an irrevocable trust established to fund OPEB. CERBT is administrated by CalPERS, and is managed by an appointed board not under the control of Agency's Board of Directors.

#### Benefits Provided

The Agency provides retiree medical benefits through the California Public Employees' Retirement System healthcare program.

Employees hired before January 1, 2010 must have a minimum of five years of service with the Agency and/or other CalPERS member agencies. The Agency's contribution amount increases annually by 5% of the active employee health insurance premium cap or \$100, whichever is less, until 100% of the active employee health insurance premium cap is reached.

Employees hired on or after January 1, 2010 must have a minimum of ten years of CalPERS service, of which a minimum of five years must be service with the Agency. The Agency's contribution amount starts at 50% (of CalPERS premium) at 10 years, thereafter, the percentage of contribution increases by 5% each additional year of Agency service through year 20 at which point it reaches 100%.

Based on Memoranda of Understanding between the Agency and the employees' union, retirees may purchase health coverage with unused sick leave. The cost to the Agency for the year ended December 31, 2018 was \$12,784. The Agency also provides health care benefits to its retirees through CalPERS. The cost to the Agency in the year ended December 31, 2018 was \$955,766.

## **Funding Policy**

The Agency's policy is to prefund these benefits by accumulating assets in CERBT discussed above pursuant to Agency Board Resolution. The contribution requirements of the plan members and the Agency are established by and may be amended by the Agency. The Agency prefunds plan benefits through the CERBT by contributing at least 100 percent of the Actuarially Determined Contribution (ADC).

Notes to Basic Financial Statements For the year ended December 31, 2018

## **Employees Covered**

As of the June 30, 2018 measurement date, the following current and former employees were covered by the benefit terms under the Plan:

Active employees	221
Inactive employees or beneficiaries currently receiving benefits	113
Inactive employees entitled to but not yet receiving benefits	
Total	334

## **Contribution Description**

The Plan and its contribution requirements are established by Memoranda of Understanding with the applicable employee bargaining units and may be amended by agreements between the Agency and the bargaining units. The annual contribution is based on the actuarially determined contribution. For the measurement period ended June 30, 2018, the Agency's cash contributions were \$907,812 in benefit payments, \$1,107,194 in payments to the trust and the estimated implied subsidy was \$244,500 resulting in total payments of \$2,259,506.

## Actuarial Methods and Assumptions used to determine Total OPEB Liability

The Agency's net OPEB liability was measured as of June 30, 2018 and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation dated June 30, 2017 that was rolled forward to determine the June 30, 2018 total OPEB liability, based on the following actuarial methods and assumptions:

Actuarial Cost Method:	Entry Age Normal
Actuarial Assumptions:	
Discount Rate	6.25%
Inflation	2.75%
Salary Increases	3.0% per annum, in aggregate
Investment Rate of Return	6.25%, assuming actuarially determined contributions funded into CERBT Investment Strategy 2
Mortality Rate <sup>(1)</sup>	Derived using CalPERS' Membership Data for all funds
Pre-Retirement Turnover <sup>(2)</sup>	Derived using CalPERS' Membership Data for all funds
Healthcare Trend Rate	Based on recent premium experience assuming 6.5%-7.5% increase due to market trends then reduced to a rate reflecting medical price inflation

Notes to Basic Financial Statements For the year ended December 31, 2018

#### Notes:

- <sup>(1)</sup> Pre-retirement mortality information was derived from data collected during 1997 to 2011 CalPERS Experience Study dated January 2014 and post-retirement mortality information was derived from the 1997 to 2011 CalPERS Experience Study. The Experience Study Reports may be accessed on the CalPERS website <a href="www.calpers.ca.gov">www.calpers.ca.gov</a> under Forms and Publications.
- <sup>(2)</sup> The pre-retirement turnover information was developed based on CalPERS' specific data. For more details, please refer to the 1997 to 2011 Experience Study Report. The Experience Study Report may be accessed on the CalPERS website <a href="www.calpers.ca.gov">www.calpers.ca.gov</a> under Forms and Publications.

#### Discount Rate

The discount rate used to measure the total OPEB liability was 6.25 percent. The projection of cash flows used to determine the discount rate assumed that Agency contributions will be made at rates equal to the actuarially determined contribution rates. Based on those assumptions, the OPEB plan's fiduciary net position was projected to be available to make all projected OPEB payments for current active and inactive employees and beneficiaries. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

## Long-term Expected Rate of Return

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class Target Allocation Expected Real Rate of Return  Global Equity $40.0\%$ $4.82\%$ Fixed Income $39.0\%$ $1.47\%$ TIPS $10.0\%$ $1.29\%$ Commodities $3.0\%$ $0.84\%$		Strateg	Strategy 2					
Global Equity         40.0%         4.82%           Fixed Income         39.0%         1.47%           TIPS         10.0%         1.29%	Agget Class	Target Allegation	Expected Real					
Fixed Income 39.0% 1.47% TIPS 10.0% 1.29%	Asset Class	Target Allocation	Rate of Return					
TIPS 10.0% 1.29%	Global Equity	40.0%	4.82%					
	Fixed Income	39.0%	1.47%					
Commodities 3.0% 0.84%	TIPS	10.0%	1.29%					
2.070	Commodities	3.0%	0.84%					
REITs 8.0% 3.76%	REITs	8.0%	3.76%					
Total 100%	Total	100%						

Assumed long-term rate of inflation is 2.75% Long-term expected rate of return is 6.25%

Notes to Basic Financial Statements For the year ended December 31, 2018

## Changes in Net OPEB Liability

The changes in the net OPEB liability for the Plan are as follows:

	Increase (Decrease)					
		Total	Plan	Net		
		OPEB	Fiduciary	OPEB		
		Liability	Net position	Liability/(Asset)		
		(a)	(b)	(c) = (a) - (b)		
Balance at June 30, 2017						
(Valuation Date June 30, 2017)	\$	28,300,821	18,576,344	9,724,477		
Changes recognized for the measurement period:						
Service cost		1,287,285	-	1,287,285		
Interest		1,958,306	-	1,958,306		
Changes of assumptions		2,045,228	-	2,045,228		
Contributions - employer		-	2,259,506	(2,259,506)		
Net investment income		-	1,516,502	(1,516,502)		
Benefit payments		(1,152,312)	(1,152,312)	-		
Administrative expense		-	(34,757)	34,757		
Net Changes		4,138,507	2,588,939	1,549,568		
Balance at June 30, 2018						
(Measurement Date June 30, 2018)	\$	32,439,328	21,165,283	11,274,045		

## Sensitivity of the Net OPEB Liability to Changes in the Discount Rate

The following presents the net OPEB liability of the Agency if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate, for measurement period ended June 30, 2018:

	•	Discount Rate	scount Rate		
	1% Decrease (5.25%)	Current Rate (6.25%)	1% Increase (7.25%)		
Net OPEB Liability	\$16,063,427	11,274,045	7,379,274		

Notes to Basic Financial Statements For the year ended December 31, 2018

## Sensitivity of the Net OPEB Liability to Changes in the Health Care Cost Trend Rates

The following presents the net OPEB liability of the Agency if it were calculated using healthcare cost trend rates that are one percentage point lower or one percentage point higher than the current rate, for measurement period ended June 30, 2018:

		Healthcare Trend Rate	
	1% Decrease	Current Trend	1% Increase
Net OPEB Liability	\$6,673,708	11,274,045	17,046,355

## OPEB Plan Fiduciary Net Position

The CERBT issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained from the California Public Employees' Retirement System, CERBT, P.O. Box 942703, Sacramento, CA 94429-2703.

## Recognition of Deferred Outflows and Deferred Inflows of Resources

Gains and losses related to changes in total OPEB liability and fiduciary net position are recognized in OPEB expense systematically over time.

Amounts are first recognized in OPEB expense for the year the gain or loss occurs. The remaining amounts are categorized as deferred outflows and deferred inflows of resources related to OPEB and are to be recognized in future OPEB expense.

The recognition period differs depending on the source of the gain or loss:

Difference between projected and actual earnings on OPEB plan investments

All other amounts

Straight-line amortization over the expected average remaining service lifetime (EARSL) of all members that are provided with

benefits (active, inactive, and retired) as of the beginning of the measurement period

Notes to Basic Financial Statements For the year ended December 31, 2018

## OPEB Expense and Deferred Outflows/Inflows of Resources Related to OPEB

For the measurement period ended June 30, 2018 (measurement date), the Agency recognized OPEB expense of \$2,259,619. As of December 31, 2018, the Agency reported deferred outflows of resources related to OPEB from the following sources:

	Deferr	red outflows of	Deferred inflows of		
	resources		resources		
Contributions subsequent to measurement date	\$	1,009,650			
Changes of Assumption		1,730,578	-		
Net Difference between Projected and					
Actual Earnings on Plan Investments		-	181,123		
Total	\$	2,740,228	181,123		

The \$1,009,650 reported as deferred outflows of resources related to contributions subsequent to the June 30, 2018 measurement date will be recognized as a reduction of the net OPEB liability during the year ending December 31, 2019. Other amounts reported as deferred outflows and deferred inflows of resources related to OPEB will be recognized as expense as follows:

Measurement Period	Deferred		
Ended June 30:	Outflows/(Inflows)		
	of Resources		
2019	\$ 269,369		
2020	269,369		
2021	269,369		
2022	269,369		
2023	314,650		
Thereafter	157,329		

## 12. Due To/ Due From Balances

Current due to/due from balances, which are expected to be repaid shortly after year end, are only used to cover negative cash balances within the Power Division due to the timing of reimbursements from the Middle Fork Project Finance Authority discussed in Note 9. As of December 31, 2018 the balance due from the Power Division to Agency Wide fund totals \$1,250,000.

Notes to Basic Financial Statements For the year ended December 31, 2018

#### 13. Prior Period Restatement

During 2018 the Agency implemented GASB 75, Accounting and Financial Reporting for Post-Employment Benefits other than Pensions, which resulted in the net Other Post-Employment Benefits (OPEB) liability to be presented in the financial statements. This resulted in a prior period adjustment to net position for \$8,684,286.

Net position at December 31, 2017		690,676,851
Adjustment to record net OPEB liability and related balances		(8,684,286)
Net position at December 31, 2017, as restated	\$	681,992,565

## 14. Subsequent Events

On January 29, 2019 PG&E Corporation and its primary operating subsidiary, Pacific Gas and Electric Company, filed voluntary petitions under Chapter 11 of the U.S. Bankruptcy Code in the United States Bankruptcy Court for the Northern District of California.

PG&E owns and operates the Drum Spaulding Project which is a complex array of gold rush mining canals, reservoirs, and hydroelectric facilities that has been in operation since the late 1800's. PG&E is contracted to provide the Agency with its primary water supply through the Drum Spaulding Project, which delivers up to 125,400 acre feet of water annually (note 6). As these are long term contracts with many years of providing water to Placer County residents, the Agency does not believe there would be an interruption in water supply and is actively monitoring the bankruptcy case to protect the Agency's best interest.

## **Notes to Schedule:**

Information is not available for 10 years

Benefit Changes: There were no changes to benefit terms specific to the plan.

Changes of Assumptions: In 2018, demographic assumptions and inflation rate were changed in accordance to the CalPERS Experience Study and Review of Actuarial Assumptions December 2017. In 2017, the discount rate was reduced from 7.65 percent to 7.15 percent. In 2016, there were no changes. In 2015, amounts reported reflect an adjustment of the discount rate from 7.5 percent (net of administrative expense) to 7.65 percent (without a reduction for pension plan administrative expense.) In 2014, amounts reported were based on the 7.5 percent discount rate.

## Water Facts

1 Cubic Foot = 7.48 GAL 100 Cubic Feet = 748 GAL 100 Cubic Feet = 1CCF\* 1 Acre Foot\*\* = 43,560 CF

1 Acre Foot\*\* = 325,851 GAL 1 CFS = 448.8 GPM 1 CFS = 646,272 GPD

1 CFS for 24 hours = 1.98 AF 1 CFS for 30 days = 59.5 AF 1 CFS for one year = 724 AF

1 Gallon = 8.34 Pounds

1 MGD = 3.07 AF per day 1 MGD = 1,120 AF per year

1 Miners' Inch = 11.22 GPM 1 Miners' Inch = 16,157 GPD

1 Miners' Inch = 1.49 AF for 30 days 1 Miners' Inch = 18.10 AF for 1 year

## **Abbreviations**

AF = Acre foot GAL = Gallon

CF = Cubic foot GPD = Gallons per day

CCF = 100 Cubic feet GPM = Gallons per minute

CFS = Cubic foot per second MGD = Million gallons per day

<sup>\*\*</sup> An acre-foot of water is enough to cover one acre of land one foot deep.

<sup>\*</sup> The Agency bills per unit of measure, which is 100 cubic feet (unit).

# Statistical Section Table of Contents

This part of the Placer County Water Agency's comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about PCWA's overall financial health.

<u>Contents</u>	<b>Page</b>
Financial Trends These schedules contain financial trend information for assessing PCWA's financial performance and well-being over time	76-79
Revenue Capacity These schedules present revenue capacity information to assess PCWA's ability to generate revenues. Water and Power sales are PCWA's most significant revenue sources	80-87
Debt Capacity These schedules present information to assess the affordability of PCWA's current levels of outstanding debt and ability to issue additional debt	88-89
Demographic and Economic Information These schedules provide information on the demographic and economic environment in which PCWA conducts business	90-91
Operating Information These schedules provide information on PCWA's service infrastructure to assist the reader in understanding how the information in PCWA's financial report relates to the services PCWA provides and the activities it performs.	92-93

- (1) The 2018 operating gain is attributable to an increase in operating revenue of \$11.5 million and an increase in operating expense of \$1.4 million. The increase in operating revenue is primarily due to an increase in water sales revenue of \$2.1 million because of the 2018 adopted rate structure change and increase and treated water consumption was higher in 2018. Also an increase in power sales revenue of \$8.1 million which reflects increased reimbursements related to capital expenses from the Middle Fork Project Finance Authority. The increase in operating expenses is primarily due to increased expenses related to road repairs and non-capital costs associated with the Hell Hole Dam Core Raise Project.
- (2) Significant fluctuation in non-operating revenues/(expenses) stems from the variance in Water Connection Charge payments for new connections which is tied to actual development and one-time water sales to agencies outside Placer County. In 2015, non-operating revenues/(expenses) also included the Agency's Eastern Water System Zone 4 transfer to Northstar Community Services District, specifically assets and cash totaling \$23.7 million and \$6 million, respectively.
- (3) In 2013, the Agency restated the 2012 net position at the beginning of the year. The implementation of GASB 65 and the classification of bond issuance costs as expenses caused the 2012 beginning net position to be adjusted by \$2,677,777. In 2015, with the implementation of GASB 68, the unfunded pension liability resulted in a prior period adjustment to net position for \$29.7 million. In 2018, with the implementation of GASB 75, the net OPEB liability resulted in a prior period adjustment to net position for \$8.7 million.

- (1) From 1963 to April 2013, the Agency had a 50 year contract with Pacific Gas & Electric Company (PG&E) for the sale of all power generated at the Agency's Middle Fork power plants. Schedules related to Power Sales as an own-source revenue were not included in the Statistical Section as PG&E was the only power customer and power sales amount was a reimbursement of costs per the 1963 contract through April 30, 2013. Since May 1, 2013, the Agency has taken over responsibility for various Power functions previously performed by PG&E and power sales has since been a reimbursement of operating expenses from the Middle Fork Finance Authority.
- (2) In 2015, Renewal & Replacement Charge and Raw Water Surcharge Revenues have been reclassified from non-operating to operating revenue, as they are considered customer charges (water rates) for use in providing cost of services.
- (3) Non-operating Water Sales are one-time water sales to agencies outside Placer County.
- (4) Significant amounts from 2008 2013 are because of the expense recovered from the Middle Fork Project Finance Authority.
- (5) Includes program grant revenues, mark to market adjustment on investments and other net income/expense. In 2015, other income/expense includes the Agency's Eastern Water System Zone 4 transfer to Northstar Community Services District, specifically assets and cash totaling \$23.7 million and \$6 million, respectively.
- (6) Significant fluctuations in total revenues stems primarily from the variance in Water Connection Charge revenues (See Note 2 on Table 1).

 $<sup>(1) \</sup> Includes \ golf \ courses, \ parks, \ and \ landscape \ greenbelt \ areas \ that \ are \ metered \ separately.$ 

Source: Placer County Water Agency, Customer Service Department

CHART # 5 Water Consumption (Treated) 2018

No Demand Residential Resale 30.31% 0.01% (Single-Unit) 43.42% Agriculture 0.64% Industrial Landscape (1) 6.78% \_Residential (Multi-Unit) Municipal 3.09% 5.51% Commercial Construction Fire Protection 0.38% 0.01%

#### CHART # 6 Water Consumption (Untreated) 2018

<sup>(2)</sup> The treated water agriculture classification is for customers involuntarily deprived of untreated water service.

<sup>(3)</sup> Accounts that pay only monthly service and renewal and replacement charges but are not consuming water. When these accounts begin consuming water, they are changed to the appropriate category. If PCWA is not notified before water consumption, some consumption will be billed and recorded in the "No Demand" category.

 $<sup>(4) \ \</sup> One \ Acre-Foot \ is \ equal \ to \ 435.6 \ Units \ which \ is \ equal \ to \ 325,851 \ gallons. \ One \ Miner's \ Inch \ for \ a \ year \ is \ equal \ to \ 18.10 \ Acre-feet \ for \ that \ year.$ 

<sup>(5)</sup> Effective Rate is reported in units (100 cubic feet) because consumption rates are per unit. The effective rate per unit includes the monthly service charge as well as the commodity tier rates.

<sup>(6)</sup> Effective Rate is calculated per miner's inch per year because consumption rates are per miner's inch. In 2011, the effective rate per miner's inch has been adjusted to account for a one-time reimbursement from PG&E for lost raw water revenue due to the Bear River Canal break.

- (1) Includes golf courses, parks, and landscape greenbelt areas that are metered separately.
  (2) Accounts that have paid the water connection charge, if applicable, and are paying monthly service and renewal and replacement charges but are not consuming water.
  (3) On October 1, 2015, the Agency's Eastern Water System Zone 4 was transferred to Northstar Community Services District, resulting in a reduction of 1,455 treated water customer accounts.
- (4) In 2016, New Connections (EDU's) for certain years were restated to include EDU's from the WCC payment program.

<sup>(1)</sup> Retail customers only. For years 2009-2017 rates are for the Zone 1 Water System service area. The Agency's Zone 1 Water System comprised 97% of total water customers, water flow and total water sales revenue, and therefore had the most significant impact on determining fees & charges. Beginning in 2018 the rates are for Zone 6 which is the consolidation of the Western Water System Zones 1, 2, 3, and 5.

<sup>(2)</sup> Charges for meters larger than 8 inches shall be determined based on the applicant's estimated maximum day demand set forth in the applicant's application for treated water service, then recalculated based on use.

<sup>(3)</sup> A 10-inch meter was added to the fee structure beginning in 2018.

<sup>(4)</sup> For years 2009-2017 this was called Capital Facilities Surcharge.

<sup>(5)</sup> General Irrigation was added to the fee schedule beginning in 2018.

<sup>(6)</sup> A 1-inch and 14-inch meter were added to the fee structure beginning in 2018.

<sup>(1)</sup> Retail customers only. For years 2009-2017 rates are for the Zone 1 Water System service area. The Agency's Zone 1 Water System comprised 97% of total water customers, water flow and total water sales revenue, and therefore had the most significant impact on determining fees & charges. Beginning in 2018 the rates are for Zone 6 which is the consolidation of the Western Water System Zones 1, 2, 3, and 5.

<sup>(2)</sup> Commodity rates are per 100 cubic feet.

<sup>(3)</sup> Prior to 2018 this was called Residential. The commodity tier structure for years 2009-2017 are as follows: Tier 1 first 400 CF, Tier 2 next 600 CF, Tier 3 next 1,000 CF, Tier 4 next 2,000 CF, Tier 5 next 1,800 CF, Tier 6 next 1,900 CF, Tier 7 over 7,700 CF. Beginning in 2018 the tier structure changed to Tier 1 first 900 CF, Tier 2 next 1,900 CF and Tier 3 over 2,800 CF.

<sup>(4)</sup> Prior to 2018 this was called Non-Residential. The commodity tier structure for years 2009-2017 are as follows: Tier 1 first 50,000 CF, Tier 2 next 450,000 CF, Tier 3 over 500,000 CF. Beginning in 2018 the structure changed to per 100 CF.

<sup>(5)</sup> New to the fee structure in 2018. For years 2009-2017 this fell into the Non-Residential class.

<sup>(6)</sup> Special rates are for customers involuntarily deprived of untreated water service. The tier structure for years 2009-2014 are as follows: Tier 1 first 400 CF, Tier 2 next 600 CF, Tier 3 next 1,000 CF, Tier 4 next 2,000 CF, Tier 5 next 61,000 CF, Tier 6 next 65,000 CF, Tier 7 over 130,000 CF. In 2015, the rate structure changed. Beginning in 2018, the tier structure changed to Tier 1 first 900 CF, Tier 2 next 1,900 CF and Tier 3 over 2,800 CF.

<sup>(7)</sup> The commodity tier structure for years 2009-2017 are as follows: Tier 1 first 50,000 CF, Tier 2 next 450,000 CF, Tier 3 next 500,000 CF, Tier 4 over 1,000,000 CF. Beginning in 2018 the structure changed to per 100 CF.

<sup>\*</sup> Water use per tier (cubic-feet) varies on an annual basis.

<sup>(1)</sup> Retail customers only. For years 2009-2017 rates are for the Zone 1 Water System service area. The Agency's Zone 1 Water System comprised 97% of total water customers, water flow and total water sales revenue, and therefore had the most significant impact on determining fees & charges. In 2018 the rates are for Zone 6 which is the consolidation of the Western Water System Zones 1, 2, 3, and 5.

<sup>(2)</sup> Commodity rates are per 100 cubic feet. The tier structure from 2009-2017 was as follows: Tier 1 first 3,000 CF, Tier 2 next 7,000 CF, Tier 3 over 10,000 CF. Beginning in 2018 the structure changed to per 100 CF.

<sup>(3)</sup> Non-metered services of untreated water are delivered in Miners' Inches. One Miner's Inch is equal to 11.22 gallons per minute. The Summer irrigation season is defined as the period of April 15 through October 15, both inclusive, of each year. Rates are per Miner's Inch.

<sup>(4)</sup> For years 2009-2017 the tier structure was Tier 1 first 1/2 MI, Tier 2 first MI, Tier 3 2-9 MI and Tier 4 over 9 MI. Beginning in 2018 the structure changed to per Miner's Inch.

<sup>(5)</sup> Beginning in 2018 the classes of Commercial Agriculture Winter and Summer were consolidated into the General Irrigation rate schedule.

<sup>\*</sup> Water use per tier varies on an annual basis. Actual ranges of cubic-feet/miner's inches differ slightly.

<sup>(1)</sup> For years 2009-2017 rates are for the Zone 1 Water System service area. The Agency's Zone 1 Water System comprised 97% of total water customers, water flow and total water sales revenue, and therefore had the most significant impact on determining fees & charges. Beginning in 2018 the rates are for Zone 6 which is the consolidation of the Western Water System Zones 1, 2, 3, and 5.

(2) Time and Materials and meters/parts are charged to customer in addition to Meter Set and Installation Charge.

<sup>(3)</sup> Delinquent Payment Charge is a percentage of the delinquent amount on a balance greater than \$20. Established in 2002.

 $<sup>(4) \</sup> Reconnection \ Charge \ starts \ at \ amount \ listed \ with \ a \ graduated \ penalty \ of \$10 \ per \ occurrence \ within \ a \ 12 \ month \ period.$ 

<sup>(5)</sup> Certification of Cross Connection Control (Backflow) Charge is a monthly charge per assembly.

<sup>(6)</sup> Certification of Domestic Water Source (Constructed Conveyance) Charge is a monthly charge per account.

Effective Rate Increase	0.21%	0.00%	0.00%	0.00%	0.00%	9.81%	6.31%	1.24%	1.43%	4.78%

<sup>\*</sup> Annual bill amount is based on water use of an average household using 18,000 cubic feet per year (the equivalent of 11,220 gallons per month) with a 5/8" meter. For years 2009-2017 rates are based on the Zone 1 Water System treated water rates, as the Agency's Zone 1 Water System comprised 97% of customers, water flow and water sales revenue. 2018 rates are based on Zone 6 which is the consolidation of the Western Water System Zones 1, 2, 3, and 5. The Agency's practice is to bill on a bi-monthly basis.

<sup>(1)</sup> Improvement District (ID) Debt is the responsibility of the individual improvement district and the principal and interest are payable solely from the property assessments levied. In 2002, PCWA formed ID 37 - Merry Knoll. This improvement district was funded by a combination of a County of Placer grant and an internal loan, therefore no debt is reported in the audited financials.

(2) Certain ID No. 10 & 11 warrants have not been presented for payment, hence they remain as a liability.

Source: Placer County Water Agency, Audited Financial Statements

<sup>(3)</sup> The revenue bonds were payable, both principal and interest, from revenues of the Middle Fork Project. These bonds were secured by water revenues, however, pursuant to the 1963 power sales agreement with Pacific Gas & Electric Company, the debt service payments were made by PG&E. These bonds were paid off in 2013.

<sup>(1)</sup> For presentation purposes, the debt service coverage is presented without Water Connection Charge Revenue. Water Connection Charge Revenue is the primary reason for the annual variance in these ratios. The Agency has experienced substantial variances from year-to-year due to varying levels of development. In 2015, \$15 million of WCC Revenue was transferred into the Rate Stabilization and Capital Improvement Fund for future capacity infrastructure projects.

- (1) In March 2010, the Information Systems Services (ISS) Division was moved from the Administration Services Department to the Financial Services Department. The ISS Division was moved back to the Administrative Services Department in October 2012.
- (2) The Resource Development Department was merged with Strategic Affairs for the period 2009-2012. Resource Development became its own department again in 2013. In 2015, the Strategic Affairs Department was eliminated and its functions incorporated into Resource Development. In 2017, Resource Development was bifurcated and its functions split into the new Energy Marketing department and the re-established Strategic Affairs.

Authorized positions are reported by department.

Annual Megawatt Hours (Millions) (3)	0.9	0.9	1.3	0.9	0.0	0.5	0.3	1.0	1.4	0.8

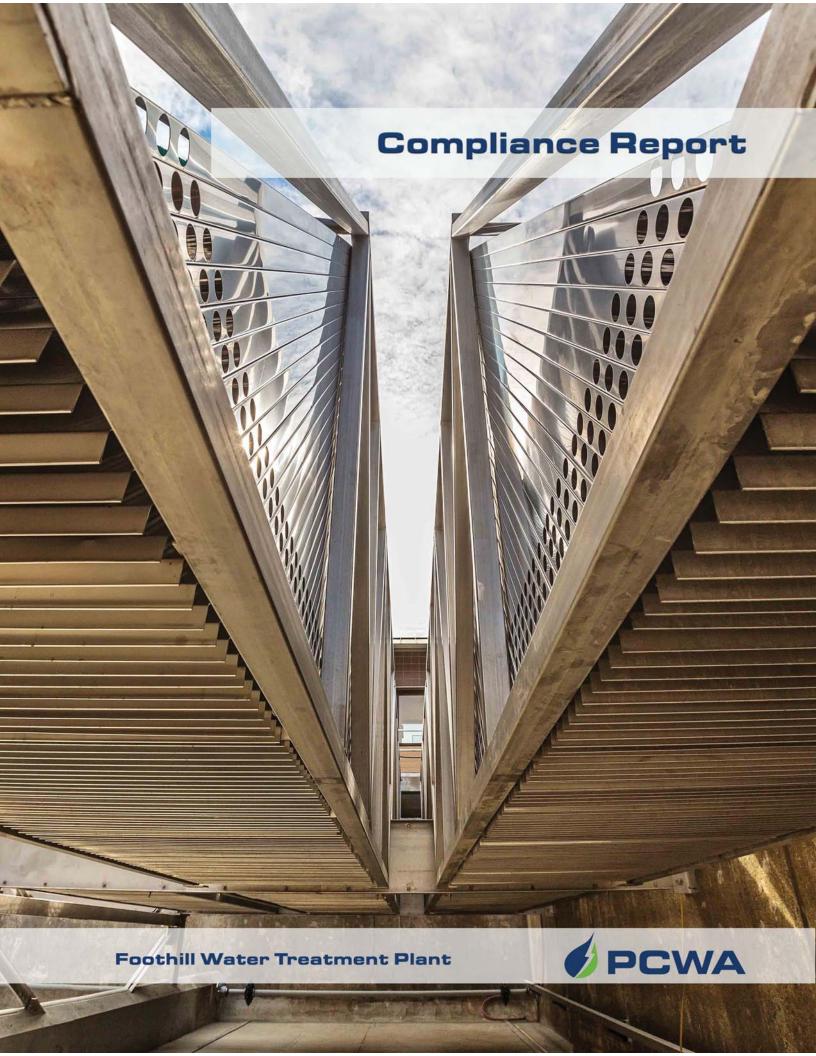

- (1) MGD = Million Gallons per Day. In 2013, the figure was adjusted to 80 to take into account restrictions in the delivery of raw water at one plant that reduces the total capacity by 3 MGDs.
- (2) Untreated (Raw) Water is amount billed, not necessarily delivered or consumed. Includes those customers purchasing in excess of current use to ensure availability for the future.
- (3) Water Billings includes the amount actually billed in the fiscal year, not the cash received. Includes water sales, monthly service charges, surcharges, renewal and replacement charges, certain other mandated costs, penalties and other similar charges.
- (4) Gross Storage Capacity (in Acre-Feet): French Meadows 134,993; Hell Hole 207,590; and Ralston Afterbay 2,782.
- (5) Actual Power Production varies by year depending on outages for significant repairs or capital projects and hydrologic conditions.
- (6) In 2011, a new methodology utilizing a Geographic Information System (GIS) was used to determine the Total Miles of Main Line Treated. In 2015, the facilities statistics reflect the transfer of Eastern Water System (Zone 4) assets to Northstar Community Services District.

# Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With Government Auditing Standards

### **Independent Auditor's Report**

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of as of and for the year ended December 31, 2018, and the related notes to the financial statements, which collectively comprise Placer County Water Agency's (Agency) basic financial statements, and have issued our report thereon dated May 3, 2019.

### **Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the Agency's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Agency's internal control. Accordingly, we do not express an opinion on the effectiveness of the Agency's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether Placer County Water Agency's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement

Placer County Water Agency Page 2

amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

### **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

<sup>(1)</sup> Power sales revenue, which reflects reimbursements of the Agency's expenses related to the Middle Fork Project, realized budget savings primarily due to lower than anticipated capital project expenses.

<sup>(2)</sup> The operating expense variance is primarily a result from under budgeting for depreciation and expenses for infrastructure repair and maintenance projects.
