1. The percentages listed are prospective. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you the actual resources in the form of a Historical Product Content Label. For more information on how much they can vary see the Price, Terms and Conditions. Visit <http://www.collectiveenergy.com> for a list of projects.

2. New Renewables come for generation facilities that first began commercial operation in the last 15 years.

For comparison, the average (2002-2006) mix of energy sources supplying the US includes: Coal (49%), Nuclear (20%), Natural Gas (18%), Large Hydroelectric (7%), Other Fossil (1%), and Renewables (2%), (from U.S. Department of Energy/Energy Information Administration)

The average home in the United States uses 900 kWh per month. [Source: U.S. EPA]
